

	Scientific name	Does it Fart?	Description/Notes	Paper/Link	Verified by	
African wild dogs	<i>Lycan pictus</i>	Yes	Any self respecting canine does		@DaniRabaiotti	
Aliens		Maybe			@christintott	*
American Badger	<i>Taxidea taxus</i>	Maybe	Elbroch (2003) describes badger scat as rancorous (can confirm); assume fart		@biologistimo	
Ammonite	<i>Ammonoidea</i>	No	molluscs don't fart- would like to question inking as farting in extant cephs		@NadWGab	
Arachnids	<i>Arachnida</i>	Maybe	Assumed as yes, but never really been proven		@SS_Henriques	**
Baboons		Yes			@Cassie_Raby	
Bats		Yes	🐈		@hammerheadbat	
Bearded Dragon	<i>Pogona vitticeps</i>	Yes			@lizardschwartz	*
Birds		No	But they could if they wanted to	http://www.popsi.com/environment/article/2009-0	@thelabandfield	*
Black Spinytail Iguana	<i>Ctenosaura similis</i>	Yes	Seems to occur more frequently when less insect/animal protein is consumed at	personal observations	@squamatasci	*
Blue mussels	<i>Mytilus edulis</i>	No			@CarinaDSLRL	
Bobcats	<i>Lynx rufus</i>	Hell Yes	Squirrel-based farts are THE WORST.		@NatickBobCat, @biologistimo	
Bristle worms	<i>Polychaetes</i>	No			@glitterworm	
Burchell's zebra	<i>Equus quagga burchell</i>	Yes	That's what they do best!		@FatbertJ	
Burmese python	<i>Python molurus</i>	Yes	Often silent but deadly. Thick, and...meaty? If it were a color it would be brown	anecdotal & personal observations	@SssnakeySci	
Camel		Yes			@cat_murray	*
Cheetah	<i>Acinonyx jubatus</i>	Yes			@hmk_oneill	**
Chimpanzees	<i>Pan troglodytes</i>	Yes			@Adriana_Lowe	
Cockroaches	<i>Periplaneta americana</i>	Yes	http://aem.asm.org/content/57/9/2628.short ; http://www.pnas.org/content/91/12/5441.full.pdf		@HereBeSpiders11	
Colobine monkeys	<i>Trachypithecus, Colob</i>	Yes			@pakasachus	
Common whelks	<i>Buccinum undatum</i>	No			@CarinaDSLRL	
Copperhead	<i>Agkistrodon contortrix</i>	Yes	Elicits a small squeak, so small that you think you may be mistaken...until it hits	anecdotal & personal observations	@SssnakeySci	
Domestic cat	<i>Felis catus</i>	Yes	Seems to worsen in vicinity of human face. Silent but deadly		@Captain_Herder @Scare	*
Domestic goat		Yes	but burps are worse			
Domestic hedgehogs	<i>Atelerix albiventris</i>	Yes	Fish makes it so much worse			
Domestic pigs		Yes				
Domestic sheep		Yes				
Domesticated Dogs	<i>Canis lupus familiaris</i>	Yes	but often takes blame from nearby hominid, Boston Terriers are famous for their farting; known to scare selves with their farts		@briamwolves, @CarinaDSLRL et al	
Elephants		Yes			@AdityGangadh	
European oysters	<i>Ostrea edulis</i>	No			@CarinaDSLRL	
Fancy goldfish		Yes			@indik	
Freshwater mussels	<i>Unionidae</i>	No	They do enjoy expelling pseudofeces			
Frogs		Yes	Pyxicephalus adspersus and Ceratophrys sp frogs both can and do fat quite often and rather pungently. (Frogs have weak sphincter)		@MarkScherz	
Crested Gecko	<i>Correlophus ciliatus</i>	Yes	Individual named Tangerine farted before defecating.		@MarkScherz	
Giraffe		Hell Yes	At "face height" of the average man			
Gorillas	<i>Gorilla gorilla</i>	Yes	See orangutans		@mjcreid, @diana_monkey	
Gray Fox	<i>Urocyon cinereoargens</i>	Yes	Heard under general anesthesia, assume possible while awake		@biologistimo	
Green Iguana	<i>Iguana iguana</i>	Yes		personal observations of captive Green Iguana	@squamatasci	
Grizzly bear	<i>Ursus arctos</i>	Yes				
Guinea Pigs	<i>Cavia porcellus</i>	Yes	Several examples heard every day, very audible and stinks to high heaven			
Herring	<i>Clupea spp.</i>	Yes	Entire bays are filled with their farts. Used for communication	http://news.nationalgeographic.com/news/2003/11/	@CarolineHFox, @galkinkat	*
Horse		Yes			@tecklen	*
Humans	<i>Homo sapiens</i>	Yes				
Isopods (marine and terr)	<i>Cirolana harfordi</i> , <i>Porto</i>	Yes	Excrete ammonia	Kirby P.K. & Harbaugh R.D. (1974) Diurnal pattern	Kim Kennedy, MSc.	*
Lagomorphs	<i>Lagomorphs spp.</i>	Yes	fay joke here "what's invisible, floats through the air, and smells like bunnies?"		@thonoir	
Lemurs	<i>Lemuroidea spp.</i>	Yes			@thonoir	
Lion	<i>Panthera leo</i>	Yes	At least sedated ones.		@FatbertJ	
Manatees		Yes	near constantly		@indik	
Mastodon		No	Not anymore		@edorsatum	*
Millipedes	<i>wide variety; see attua</i>	Yes	Yes, of the silent but deadly variety (methane AND hydrogen sulfide!)	http://journals.plos.org/plosone/article?id=10.1371	@HereBeSpiders11	
Moonsnails	<i>Naticidae</i>	No			@biolumiEFFence	
Mustelids	<i>Mustelidae spp.</i>	Yes			@thonoir	
Orangutan		Yes	They do it often and have no shame		@mjcreid	
Panther Chameleon	<i>Furcifer pardalis</i>	Yes	Sometimes while defecating - audible and stinky			
Parakeets		Maybe	My friend's parakeet farted in my face when I was 9 years old. (Note: literature disputes this - see "Birds", which are purported not to fart)			
Parrots		No	:(@alexevans91	
Pupfish	<i>Cyprinodon spp.</i>	Yes	Ingest air with solids during summer months. Associated with behavioral change	http://www.tandfonline.com/doi/abs/10.1577/1548	@jenyngum	*
Rabbits	<i>Oryctolagus sp</i>	Yes	Gas is dangerous in rabbits, however. It can cause intestinal stasis and lead to death within a short period of time.			
Rats		Yes	They smell worse than dog farts		@Julie_B92 and @JuliesRats	
Rhesus macaque		Yes			@laurenmrobin	
Rhinoceros Iguana	<i>Cyclura cornuta</i>	Yes	"Sounds wet". Increased frequency with higher fruit and/or fiber intake. High p	personal observations of captive cyclura	@squamatasci	
Rotifers		Maybe	Probably not, but if they can they'd be tiny. No one to offend if you're asexual tho		@Julie_B92	
Salamanders		Maybe	probably not audibly (see frogs), but their poops smell really bad		@PlethodNick	
Sea Anemone		No	But awful burps	https://books.google.com/books/about/Invertebrate	Barnes, Robert D. (1982). Invertebrate Zoology	
Seals		Yes	Smells like lutefisk		@DaniRabaiotti	
Shore crabs	<i>Carcinus maenas</i>	No			@CarinaDSLRL	
Skunks		Yes				
Sloths		Yes				
Snakes		Yes			@AlongsideWild	
Snakes - ball python	<i>Python regius</i>	No	We have not heard any audible sounds from the vent in 5+ years of care		@mbystoma	*
Snakes - corn and rat snake	<i>Pantherophis spp.</i>	Yes	Often with defecation		@mbystoma	*
Snakes - milksnake	<i>Lampropeltis triangul</i>	Yes	Often with defecation and quite smelly		@mbystoma	*
Snakes - western hogno	<i>Heterodon nasicus</i>	Yes	Powerful for the size with defecation and extremely foul smelling		@mbystoma	*
Snow leopards	<i>Panthera uncia</i>	Yes	Their floofy bottoms help to muffle the sound			
Soft-shell clam	<i>Mya arenaria</i>	No	But they can puke (technically) - see next sheet		@SS_Henriques	**
Spiders	<i>Araneae</i>	Maybe	Broadly assumed as yes, but never really been proven.			
Spotted hyenas	<i>Crocuta crocuta</i>	Yes	Especially bad after eating camel intestines		@AriDheer	
Squid, octopus, cuttlefish	<i>Many</i>	Yes	If we count air coming out of the siphon as farting, yes		@sarhacmackattack	
Syrian hamster		Yes	probably; see rats, plus anecdota		@BeesAndBaking	@indik
Tapirs	<i>Tapirus spp</i>	Yes	In great amplitude			
Termites	<i>Reticulitermes, others</i>	Yes	A lot--may be a significant contributor to global climate change	http://science.sciencemag.org/content/218/4572/56	@HereBeSpiders11	
Tortoise - radiated	<i>Astrochelys radiata</i>	Yes			@mbystoma	
Unicorns	<i>Equus unicornus</i>	Yes	it's glitter and rainbows soft serve		@NadWGab	
Wombat	<i>Vombatidae</i>	Yes		https://www.youtube.com/watch?v=VHv2yAuZdk	@ivandaum	
Woodlice	<i>Armadillidium vulgare</i>	Yes	Excrete ammonia	Wright J.C. & Peña-Peralta M. (2005) Diel variatio	Kim Kennedy, MSc	**

Animal	Scientific name	Does it Puke?	Verified by
Arachnids	Arachnida	Assumed as yes, but yet to be tested	@SS_Hemlock
Rats	Rattus norvegicus	Not actively (emesis) but can passively regurgitate	https://pubmed.ncbi.nlm.nih.gov/abstract/254101271/journal.pone.0200237
Domestic Cat	Felis Catus	Yes, even eats grass to induce vomiting. Hairball control & elimination.	@Captain_Herder
Mites	Acar	Several ticks species do it (transmitting diseases in the process)	@SS_Hemlock
Northern Fulmar	Fulmarus glacialis	Sort of. They oil spit as a defense mechanism	@carolinefox
Spider	Araneae	Yes, all spiders do it as part of their feeding process, and several species do it to feed their young	@SS_Hemlock
Humans	Homo sapiens	Yes. And some males of this species find it funny. YEAHH DUDE	
Cows		Regurgitation is an important part of their digestion process.	
Soft-shell clams	Mya arenaria	Yes, sort of. AKA piss clams, these little bastards can shoot water containing undigested food out of their siphons when they are threatened by a predator. Case in point, my many field outings in which soft-shell clam puke was shot up my shorts.	@biolumiJEFence
African wild dogs	Lycan pictus	Yes. They regurgitate food all over the place when they have pups. Think meat vomcano	@DaniBabalotti
Moths and butterflies	Lepidoptera	Many species vomit as caterpillars, probably to become less palatable to predators	
Horse	Equus ferus caballus	Nope. Horses cannot vomit.	
Horse		Yes, horses can vomit but it comes out the nostrils and the horse cannot breath during this	
Vulture		Yes, means of defense.	
Rabbits		No (Rabbits don't have gag reflexes)	

Animal	Scientific name	Does it Sneeze?	Notes
Snake - corn	<i>Pantherophis guttatus</i>	yes	A quick whiff from the nose
