

"The fastest wind speed ever recorded -115km an hour- occurred during a tornado in the USA"

"A tornado with wind speeds of more than 480km an hour has the power to derail trains"

"Wildfires are so powerful that they can create their own weather"

"They are, not surprisingly, one of the most dangerous natural disasters."

"Hailstorms as deadly as this are rare, but hail itself is not uncommon."

"When a volcano erupts, a glowing sea of molten lava flows down it's sides, destroying everything in its path"
