Processing/Conversion Facility												

* Tajiguas Landfill: This landfill has three facilities that are approved and permitted by CalRecycle, but not yet in use. CalRecycle denotes them as 'planned'. The approved facilities include: composting facility, large-volume transfer/processing facility, large-volume in-vessel digestion.

*Santa Maria Regional Landfill: This landfill has one chipping and grinding facility that has been approved and permitted by Cal Recycle, but not yet in use.

*Engel & Gray's permitted tonnage is expressed in terms of years, not days. For purposes of this project, we divided the yearly permitted throughput of 208,800 tons by 313 days, which is an estimation of their operational days.
