Bingus man/ @cryptobingus on twitter	Graphics/Visual Content	KadenaSwap	Kadenaswap's core value proposition put in simple terms with striking visuals. I'd like to see what makes it unique compared to other similar products. The space is crowded and it seems to be the most common question from new people coming on to telegram. Video or visual content would both do well. I love the text posts, as does everyone in the Kadena community but with so much noise and competitors, something simple and visually striking would go a long way.
Morgan Denner	Blog or Articles/Written Content	KadenaSwap	Shill
@H3R3TIKAL	Graphics/Visual Content	KadenaSwap	Overview to help answer a "why Kadena?" For new users who may not be familiar with blockchain. A series of unique selling points would be great, and also details of liquidity mining programs + APY % would be nice (potentially of KDA/FLUX LP or KDAX/FLUX LP).

			I'm in Unique one telegram and they doubled members there overnight. They also tried to get Rare to show up in the popular search results in Coingecko. They also got a bunch of attention on Twitter. All that was from a dumb giveaway bot in telegram where you had to: <ul style="list-style-type: none"> <li>- give if your telegram handle</li> <li>- then give if your twitter handle</li> <li>- then retweet some Unique one tweet and tag 5 other twitter people ("friends")</li> <li>- then comment on that same tweet and tag 5 friends again</li> <li>- then favorite Rare in coingecko and take a screenshot, and post that image as a "file" in the group's telegram</li> <li>- then it said you were done. I think 10 winners will split like \$10k USD</li> </ul>
BufoBats	Dumb community boost stuff	Givesway campaign	It's shameless and dumb but it did explode community
Panda777	Blog or Articles/Written Content	KadenaSwap	I would be interested in that. You have a strong project and a good team. I think it will be useful.

			I'm interested in being an ambassador for your project. I have a network of around 12k between my different social media accounts and am followed and respected as a gem hunter and technical analyst by many much larger accounts. I also have a background in marketing, graphic design and branding. I'm reaching out to you because I'm really impressed by your project and I feel it deserves way more attention than it's currently getting. If Kadena swap can attract even 1/10th of the liquidity of Uniswap then I feel mass adoption would happen quite quickly. You clearly have a superior product and I would like to help you market it.
