TranscribeMe_1.wav		this truck is trying to do something where we don't use physics ideally we want to actually avoid collisions I'm going to avoid collisions by doing a line price and then calculating the time it would take for droplet too. This looks like this now you can see or hear the version that I'm playing with has a projected line traces and they project everywhere	This struct is trying to do something where we don't want to use physics. Ideally we want to actually avoid collisions and we're going to avoid collisions by doing a line trace, and then calculating the time it will take for a droplet to fall. This looks like, this, now you can see over here the version that I'm playing with has projected line traces and they project everywhere	0.6769230769
