	system	hostname	status	error desc	remarks
example:	phx lab	fc21-vm05.phx.ovirt.org	ERROR	slave is down	
	phx lab	fc21-vm05.phx.ovirt.org	ERROR	stuck running yum install - http://jenkins.ovirt.org/job/mom_master_create-rpms-fc21-x86_64_merged/14/console	
		http://jenkins.ovirt.org	ERROR	service sometimes become unresponsive	
	vdsm functional tests		IMPROVEMENT	Run inside mock to ease dependency management	
	vdsm unit tests		IMPROVEMENT	Run inside mock to ease dependency management	
	mom		ERROR	Failing to build rpms	
	vdsm install sanity		ERROR	Version conflicts	
	ovirt-live		IMPROVEMENT	test nested hosts (fc20 minimum)	
	db-report		IMPROVEMENT	fix (it was using a custom installation of an external tool, that we lost on the slave migration)	
	repoclosure jobs		IMPROVEMENT	Get them finally working, having them red all the time does not help	
	hosted-engine-ha_master		ERROR	Failing to build rpms on fc21	
	All jobs, mock cleanup		IMPROVEMENT	Make sure there are no mount when cleaning up mock chroots	
	engine-dao merged		ERROR	Failing on transaction aborted	
	engine-extension jobs		ERROR	fail to build on fc21	
	PHX lab		IMPROVEMENT	get the squid proxy to speed up jobs/installs	
	master coverity job		MINOR	It's been failing for some time	
	jenkins		ERROR	builds are executed on f21 slaves also if the job is restricted to build on fc19 fc20 el6 el7	http://goo.gl/01Wp22
	mock		ERROR	builds using mock are failing on F21.	
	jenkins		IMPROVEMENT	since we're not going to work on f21 until engine and reports are fixed, better to reprovision f21 slaves and gain executors.	
	jenkins		ERROR	http://jenkins.ovirt.org/job/ovirt-engine_master_create-rpms_merged/label=el6/2779/	runs for more than 1 da
	gerrit		ERROR	I'm getting a lot of Server Unavailable messages
