Could not find the song- interest song called "The first," commone who owns the tape was contacted by Seven Wonders, firmule singer, ruled out. Mantioned on Whangi video, ruled out.

What does this spreadsheet keep track of?

This spreadsheet keeps track of all possible leads related to the Most Mysterious Song on the Internet that have been contacted or investigated.

How often is the spreadsheet updated?

The spreadsheet is updated every time a new lead, or new information about a lead, is found.

What do the different statuses of the leads mean?

A Possible Lead is either a band or musical artist that may have made the song or another entity that may have information about the song. Possible Leads are in the process of being investigated and/or have been contacted but have not responded yet.

A Confirmed Lead is a lead from which information about the song has been gathered.

A Ruled Out lead did not make the song (in the case of bands/musical artists) or does not have any information about the song (in the case of other entities). A lead can be ruled out through investigation or through direct contact.

A Ruled Out (Very Likely) lead is a lead that cannot be directly contacted but, through investigation, has been found to have a 90-99% chance of being ruled out.

A Dead Lead is a lead that has not responded to us when contacted or is no longer being investigated. Note that Dead Leads are neither confirmed nor ruled out, and can be revived if new information becomes available.

I have some new information about a lead. Who do I tell?
