

Hello Reddit!

I made this XP Calculator for my partner Bug Catcher, who didn't think he could make it to Legacy 40 in time. The spreadsheet breaks down the path to 20,000,000 XP into daily goals, and suggests interactions to get to each day's goal. Turns out, he's been ahead of schedule 3 days in a row!

Feel free to "File" > "Make a Copy" for your own use. Just type in your XP in the column labeled "Type XP Here". If you are behind us, you'll need to copy that same lower number into all the past dates to make it work. If you're ahead of us, it will jump to where you are and do just fine going forward.

If you know you are going to do a certain interaction for the day--make several Ultra Friends or a Best Friend for example--you can type that in as a Planned Interaction and the suggested interactions adjust to match. Similarly, if you're all out of raid passes and know you won't be doing any raids, you can set the Planned Interactions for raids to zero and everything else will be adjusted up to still help you make it to your goal.

(cont.)

If you've appreciated this tool, or just want to cheer us on to Level 40, please give us an add in the app!

As an aside, you can level up with twice as many friends if you can coordinate and open gifts every other day. Eg, you open our gifts on even days like 11/22 & 11/24 and we open your gifts on odd days like 11/23 & 11/25. Let me know on Reddit at AssignedSnail if you want to coordinate. We can still make it to Ultra Friends by Dec 17 only opening / sending 13 gifts each if we plan it.

We can't wait to see you in game!
