NODK-1	•	Click on Custom server paths Rotate devices screen Click on Form list path Rotate the screen		
NODK-1		Try multiclick on: Custom server path Form list path Submission path 3818		The header should not disappear The view should not b
NODK-213	Image widget	User adds photo in vertical/horizontal orientation 36	NewAppearance.xml	User sees that added photo is in correct orientation
NODK-213	Image widget	User starts form with image widget with appearance="new" 108		Choose Image is not available for appearance="new"
NODK-213		User adds photo from Google Drive 2151		User is able to add image from Google Drive
NODK-213	Image widget	User uses Collect with targetSdkVersion set to 23. User tries to add photo. 2263		User sees permission dialog
NODK-213	Image widget	The user starts a form with images The user chooses some image The user sees dialog "please	e wait a few moments" and changes device orientation	
NODK-213 NODK-213	Image widget	User sets targetSdkVersion to 24. User makes a picture User opens added image 2604 User starts form with ImageWebViewWidget and AlignedImageWidget 2800	webAndAlign.xml All widgets	User should be able to add an image No crashes should AlignedImageWidget and ImageWebViewWidget are rem
NODK-213	Image widget	User downloads some image via browser. User opens the All widgets form. User navigates to the		
NODK-213	Image widget	User changes default image size settings User attaches image with EXIF data User attaches ro		EXIF data are still visible (in Photo Exif Editor) after attach
NODK-213	Image widget	User opens Image widget User takes a new photo and finishes submission User starts again thi	-	
NODK-213	Image widget	Go to developer options Change Background process limit configuration to No background proc	cesses Go to Collect and open form with image wide	After swiping backward or forward app should not crash
NODK-214	Selfie widget	User adds photo to selfie widget in vertical and horizontal position 1551 A	All widgets.xml	User is able to add photo. App does not crash
NODK-214	Selfie widget	User adds photo to selfie widget in vertical and horizontal position 1552		Added photos are in correct orientation
NODK-214	-		selfies.xml	The user is able to take a picture via front camera. Quest
NODK-214 NODK-214	Selfie widget Selfie widget	User tap on the screen multiple times 2360 User uses Collect with targetSdkVersion set to 23. User tries to add photo. 2263		App is not crash User sees permission dialog
NODK-214 NODK-214	Selfie widget	User clicks plenty of times on area where Take Picture button is 3790		Crash does not occur
NODK-219	Spinner widget		selectOneMinimal.xml	Spinner widget opens with start-of-list
NODK-220	Audio widget		NewAppearance.xml	Choose Sound is not available for appearance="new"
NODK-220		User records or adds sound. 2028		User sees player. 'Play Sound' button is not visible
NODK-220	Audio widget	User adds audio file from Google Drive 2159		Audio file is added
NODK-220	Audio widget	User uses Collect with targetSdkVersion set to 23. User tries to add audio. 2366		User sees permission dialog
NODK-220		User tries to record audio via Sony Audio Recorder app 2342		User is able to add audio correctly
NODK-220	Audio widget	User adds audio file from existing files on device (select Open from Audio option) User records n	new audio User opens hierarchy view 4067	The dot between name and file extension is visible
NODK-220	Audio widget	User goes to Audio widget 4164		Margin for buttons is visible
NODK-220 NODK-220	Audio widget	User starts form with audio widget User attaches longer than an hour audio file 4183	AllO (400)	File is attached and time is displayed as "hh:mm:ss:"
NODK-220 NODK-220	Audio widget Audio widget	Using external app for audio recording option is disabled User starts form User clicks on 'Rec A Using external app for audio recording option is disabled User starts form User clicks on 'Reco		User is able to answer other questions Recording is cont
NODK-220	Audio widget	Using external app for audio recording option is disabled. User starts form User clicks on 'Reco		User is asked to stop recording before changing screen
NODK-220	Audio widget	User starts form User clicks on 'Record Sound' and scrolls to end User swipes backward User		Swipe backward -> user is not moved to the top of the pa
NODK-220	Audio widget	User starts form with quality="voice-only" and quality="normal" and quality="low" User record,		User sees that amr file is visible for quality="voice-only"
NODK-220	Audio widget	User fills audio widget and records audio via internal recorder User clicks on pause and stop but		Error message is visible
NODK-220	Audio widget	User starts recording via internal recorder User clicks on pause and stop button in the same time	e 4291	Collect should not crash Using pause and stop buttons a
NODK-220	Audio widget	Start recording using another audio recorder app Switch to Collect and open a form that an audi	lio question (that has quality set to use the internal re	Recording fails to start and the app does not crash. * Use
NODK-220	Audio widget	External app for recording is used as a default User starts form where audio quality is set User r		All audio widgets are blocked
NODK-220	Audio widget	User uses form with "voice-only" quality User starts recording User pauses recording User stop		The app is not freeze Stop works when paused
NODK-220 NODK-221	Audio widget	User starts recording using an internal recorder with voice-only quality User taps on stop and pa		Collect should not crash Using pause and stop buttons a
NODK-221 NODK-221		User is on question with image-map widget (single select) 1764 User is on question with image-map widget (multi select)	All widgets.xml	User is able to select one part of image. User is able to select few parts of image.
NODK-221		User zooms on image		Extra space is not visible. Zoom buttons are not visible
NODK-221		User is on question with image-map widget		User sees that image takes 90% of screen.
NODK-221		User removes response and confirm 1903		Selected parts are removed
NODK-221	Image-map widget	User is on question with image-mapp widget. User selects answer 1855		Second click on answer does not unselect it for single se

NODK-210 NODK-213	Annotate widget Image widget	menu User clicks on '+' once again User adds photo in vertical/horizontal orientation 36	Options have icons 2858 User sees that added photo is in correct orientation
NODK-213 NODK-213	Image widget Image widget	User adds photo in vertical/horizontal orientation 36	User sees that added photo is in correct orientation Choose Image is not available for appearance="new"
NODK-213 NODK-213	Image widget	U User adds photo from Google Drive 2151	Choose image is not available for appearance="new" User is able to add image from Google Drive
NODK-213 NODK-213	Image widget	User uses Collect with targetSdkVersion set to 23. User tries to add photo. 2263	User sees permission dialog
		The user starts a form with images The user chooses some image The user sees dialog "please wait a	
NODK-213	Image widget	few moments" and changes device orientation 2158	ODK Collect does not crash and image is loaded
NODK-213	Image widget	User sets targetSdkVersion to 24. User makes a picture User opens added image 2604	User should be able to add an image No crashes should be visible User is able to preview added image.
NODK-213	Image widget	User starts form with ImageWebViewWidget and AlignedImageWidget 2800	AlignedImageWidget and ImageWebViewWidget are removed so if we use web or align appearance an ordinary ImageWidget will be used.
NODK-214	Selfie widget	User adds photo to selfie widget in vertical and horizontal position 1551	User is able to add photo. App does not crash
NODK-214	Selfie widget	User adds photo to selfie widget in vertical and horizontal position 1552	Added photos are in correct orientation
NODK-214	Selfie widget	User starts form with appearance="new-front".	The user is able to take a picture via front camera. Questions with appearance="selfie" also works correctly.
NODK-214	Selfie widget	User tap on the screen multiple times 2360	App is not crash
NODK-214 NODK-219	Selfie widget	User uses Collect with targetSdkVersion set to 23. User tries to add photo. 2263	User sees permission dialog
NODK-219 NODK-219	Spinner widget Spinner widget	User starts form. User opens list with answers 1935 User uses dark theme. User opens popup dialog of Spinner widget 2213	Spinner widget opens with start-of-list User sees that dialog is lighten
NODK-224	Ex integer widget	User clicks on Launch button	The keyboard is visible just after showing an EditText field
NODK-225	Ex decimal widget	User clicks on Launch button 1864	The keyboard is visible just after showing an EditText field
NODK-223	Ex string widget	User clicks on Launch button 1864	The keyboard is visible just after showing an EditText field
NODK-221	Image-map widget	User is on question with image-map widget (single select) 1764	User is able to select one part of image.
NODK-221	Image-map widget	User is on question with image-map widget (multi select)	User is able to select few parts of image.
NODK-221	Image-map widget	User zooms on image	Extra space is not visible. Zoom buttons are not visible
NODK-221 NODK-221	Image-map widget	User is on question with image-map widget	User sees that image takes 90% of screen. Selected parts are removed
NODK-221 NODK-221	Image-map widget Image-map widget	User removes response and confirm 1903 User is on question with image-mapp widget. User selects answer 1855	Selected parts are removed Second click on answer does not unselect it for single select question. Second click on answer unselects it for multi select
NODK-221	Image-map widget	User is on question with body. User clicks on corpus 2107	Element is not clickable because it does not exist in the database
NODK-221	Image-map widget	User opens form with readonly option in the selectMap widgets 2558	readOnly option is supported for single select and multi select
NODK-220	Audio widget	User starts form with audio widget with appearance="new" 108	Choose Sound is not available for appearance="new"
NODK-220	Audio widget	User records or adds sound. 2028	User sees player. 'Play Sound' button is not visible
NODK-220	Audio widget	User adds audio file from Google Drive 2159	Audio file is added
NODK-220	Audio widget	User uses Collect with targetSdkVersion set to 23. User tries to add audio. 2366	User sees permission dialog
NODK-220 NODK-222	Audio widget	User tries to record audio via Sony Audio Recorder app 2342	User is able to add audio correctly
NODK-222 NODK-222	Video widget Video widget	User starts form with video widget with appearance="new" 108 User starts form 1985	Choose Video is not available for appearance="new" User is able to record video using front camera
NODK-222	Video widget	User adds video file from Google Drive 2159	Video file is added
NODK-222	Video widget	User tapa the screen multiple times 2360	App is not crash
NODK-222	Video widget	User sets targetSdkVersion to 24. User records the video User opens recorded video 2599	Video should be recorded No crash should be visible User should be able to open recorded video.
NODK-222	Video widget	Microphone permissions are not selected User tries to record selfie video 2565	Dialog appears where the user is able to allow the Microphone permission
NODK-227	Rank widget	User opens form with rank widget. 2180	
NODK-227	Rank widget	User opens form with rank widget. 2334	User sees "Rank items" button, after clicking on that user see list of items and he is able to change order of the items by using drag and drop. Rank is created successfully, user is able to submit the form. Hierarchy numbers are visible on the left side of the rank list
NODK-227	Rank widget	User opens form with rank widget. 2363	Rank widget is visible as a dialog
NODK-227	Rank widget	User opens form with a few rank questions are in field-list 2552	User is able to answer on all questions in form
NODK-227	Rank widget	User opens form with readonly option in the Rank widget 2551	readOnly option is supported in the Rank widget
NODK-227	Rank widget	User rotates screen when ranking window opened. 2742	App should not crash.
NODK-227	Rank widget	User opens form User scrolls on the list 2983	Scroll on Rank list does not cause an unexpected disorder
NODK-228	SelectMultipleAutocompleteWidget	User opens form with SelectMultipleAutocomplete widget. 2395	User opens form with SelectMultipleAutocomplete widget. Options are separated by lines
NODK-235 NODK-235	General Settings - Server - Other General Settings - Server - Other	User chooses in Server Settings type: Other. 2303 User edits Form list path and Submission path.	Other platforms settings should appear. Changes are updated imemdiately.
NODK-235 NODK-240	Admin Settings - Reset application	User goes to Admin Settings. User clicks on Reset Application. User resets some data. 1269	Changes are updated imemolately. Reset result dialog does not disappear after change device orientation
NODK-240 NODK-240	Admin Settings - Reset application	User unchecks a couple of admin settings options. User resets all settings. 1067	Admin settings are updated
NODK-240	Admin Settings - Reset application	User changes the language in general settings. User resets all settings.	Language is updated immediately
NODK-240	Admin Settings - Reset application	User clicks on 'Reset application'. Pop up appears 1836	Reset button is disabled when nothing is selected.
NODK-240	Admin Settings - Reset application	User clicks on "Reset application". Pop up appears. User checks and unchecks options	Focus on center is not visible
NODK-243	Admin Settings - Form Entry Settings	User unchecks "Allow moving backwards in forms" option. 1456	User is not able to move backwards when filling form.
NODK-243	Admin Settings - Form Entry Settings	User selects 'Defer validation until finalized' and then Admin unchecks "Allow moving backwards in forms" option. 1704	Constraint processing option is set as 'Validate upon forward swipe' and is not editable
NODK-243	Admin Settings - Form Entry Settings	User sees dialog with buttons: Yes/No 1456	Edit Saved Form, Save Form, Go To Prompt, Constraint processing is set to Validate upon forward swipe if user clicks on Yes
		User unchecks "Allow moving backwards in forms" option. User starts form. User restarts a phone.

Basic criteria General Settings - Form management		
General Settings - Form management	User uninstals update of Google Play services and replaced the app with the factory version 2446	User is able to fill form and send it
		User sees that finished forms are sent automatically when device is connected to WiFi
General Settings - Form management		User sees that finished forms are sent automatically when mobile data are turned on
General Settings - Form management		User sees that finished forms are sent automatically when device is connected to internet
General Settings - Form management	User sees information in notification. User clicks on it. 2179	Dialog is visible with results
General Settings - Form management		User sees that form is deleted after send. User cannot review sent form, eye icon is visible.
General Settings - Form management General Settings - Form management		User sees that finalize checkbox is auto-selected at the end of form and form is ready to send User sees validation toast during filling form
General Settings - Form management		User is moved to the question with validation ONLY when user clicks on 'Save Form and Exit' button
General Settings - Form management		Photos are take in one of selected size: Original size from camera (default) / Very small / Small / Medium / Large
General Settings - Form management		User sees guidance. The is not option to collapse and expand it
		User sees guidance. The is option to collapse and expand it. Icon is visible at whole. Hint is not doubled in Full date
General Settings - Form management	User sets "Show guidance for questions" as Yes - collapsed 2007	and time question.
General Settings - Form management	User sees Hide old versions option 1694	Option is selected as default
Admin Settings - Import/Export Settings	User installs Collect. User changes few settings. User exports settings to QR code and file. Other user imports settings from Qr code and file 1523	Settings are consistent with the set. There is no crash.
Admin Settings - Import/Export Settings	User installs Collect. User changes few settings. User resets all settings	All settings are set as default
	User installs Collect. User changes few settings. User exports settings to QR code without passwords. Other user imports	
Admin Settings - Import/Export Settings	settings from Qr code	Settings are consistent with the set
Admin Settings - Import/Export Settings	User opens Import/Export Settings 1857	User sees Share icon and Save Settings icon. Pop up menu is not visible
Admin Settings - Import/Export Settings	App to handle an image pick intent is not installed. User selects 'Select code form SC Card' 1932	App does not crash. User sees toast. QR code is not regenerated when settings were not changed. The last generated QRCode is cached in the sd-
Admin Settings - Import/Export Settings	User opens Import/Export Settings few times 1879	card.
General Settings - User and device identity	User opens Form Metadata. User adds Email address 1308	Email address is validated and requires @
General Settings - User and device identity	Username is not set in server and form metadata.	Question in form is empty
Orange Orthogon Users and device identity	General Settings -> Server -> Username is 'AAA' General Settings -> User and device identity -> Form	Linear and from One we leadely be form
General Settings - User and device identity	metadata: Username is not set General Settings -> Server -> Username is not set General Settings -> User and device identity -> Form	Username from Server is visible in form
General Settings - User and device identity	metadata: Username is 'BBB'	Username from Form metadata is visible in form
	General Settings -> Server -> Username is 'AAA' General Settings -> User and device identity -> Form	
General Settings - User and device identity	metadata: Username is 'BBB'	Username from Form metadata is visible in form
Admin Settings - Form Entry Settings		User is not able to move backwards when filling form.
Admin Settings - Form Entry Settings	User selects 'Defer validation until finalized' and then Admin unchecks "Allow moving backwards in forms" option. 1704	Constraint processing option is set as "Validate upon forward swipe' and is not editable Edit Saved Form, Save Form, Go To Prompt, Constraint processing is set to Validate upon forward swipe if user
Admin Settings - Form Entry Settings	User sees dialog with buttons: Yes/No 1456	Edit Saved Form, Save Form, Go to Prompt, Constraint processing is set to validate upon forward swipe if user clicks on Yes
Admin Settings - Form Entry Settings	User unchecks "Allow moving backwards in forms" option. User starts form. User restarts a phone. 1675	User sees question on which he finished. User is not able to moving backwards
Fill Blank Form - Auto Send	User uses form with auto-send attribute 1952	Only auto-send attribute causes sending form. auto-submit attribute is not longer exist
Fill Block Form Auto Sand	Hear file form with configuration: Auto Cond. Off. Delate offer and	Form is auto sent and removed from device. There is no opportunity to open sent form in "View Sent Form".
Fill Blank Form - Auto Send	User fills form with configuration: Auto Send - Off; Delete after send - Off; auto-delete="true"; auto-send="true" 791 1750	Crossed eye icon is visible. Form need to be manually selected to send. User can open form in 'View Sent Form'. Crossed eye icon is NOT
Fill Blank Form - Auto Send	User fills form with configuration: Auto Send - On; Delete after send - On; auto-delete="false"; auto-send="false" 791 1750	Form need to be manually selected to send. User can open form in 'view Sent Form'. Crossed eye icon is NO I visible.
		Form need to be manually selected to send. There is no opportunity to open sent form in 'View Sent Form'.
Fill Blank Form - Auto Send		Crossed eye icon is visible.
Fill Blank Form - Auto Send Fill Blank Form		Form is auto sent. User can open form in 'View Sent Form'. Crossed eye icon is NOT visible. Fill Blank Form list is not opened two times
Fill Blank Form	User clicks quickly on 'Fill Blank Form' button in main menu several times 1630	Progress bar is visible.
Fill Blank Form	User clicks quickly on some form several times 1630	Form is not open two times
Fill Blank Form	User saves/ignores changes or finish form 2229	User is always moved to main menu view
Fill Blank Form		Forms are sorted alphabetically even if form names starts from lower case and upper case
Fill Blank Form	User sorts forms by the newest date 1555	Forms are sorted correctly. The most recent forms are visible as a first.
Fill Blank Form		User sees ODK Collect dialog with Save/Ignore options and icons
Fill Blank Form		User is able to open second version of this form and fills it without problem
Fill Blank Form	User fills form where widgets are read-only 1319	Read-only strings have black color
Fill Blank Form	User clicks on search icon on header (magnifier) 1287	Search view is in the app bar itself. Additional space is not occupied.
Fill Blank Form	User is on view with 'Save Form and Exit' button. User edits name and changes device orientation. 1219	Name changed by user is visible even if user changes device orientation on minimizes ODK
Fill Blank Form	User uses navigation buttons. User is on first question. User changes device orientation.	Backward button is not clickable on first question in form if user changes device orientation
Fill Blank Form		Form which contains invalid URL address is not displayed on fill blank form list.
Fill Blank Form		User sees navigation button even if buttons were turned on during filling form.
Fill Blank Form	User opens specific forms where value has a different type than expected 1560	App does not crashes
Fill Blank Form		Form is loaded correctly
Fill Blank Form Fill Blank Form	User fills form with images on group with appearance="field-list". User removes added image. 1824 User starts form. User fills K050003, 05. User goes to next view. 1695	Blank space is not visible User sees California
Fill Blank Form	User starts form. User fills KUSUUUU3, US. User goes to next view. 1695 User fills form and adds some media : video, photo, audio. User saves form. User edits form and update media. User ignore	User sees California
Fill Blank Form	last changes. User opens form again 2049	Media files added as a first in form are still visible.
Fill Blank Form	User starts form witth random(). User fills it few times and sends. 2144	User sees that values are really random for the same device
Fill Blank Form		n1 question is visible as a first
Fill Blank Form		User sees 'Action needed' dialog
Fill Blank Form	User fills different-search-appearances.xml form 2501 2502	Search textbox is not displayed if search() appearance is set
Fill Blank Form - Audit file	User loads form with audit 1340	ODK does not crashes. User is able to use this form
