We did not write it down, and it involved many different employ	user who contribute	f data from their respective proven	mmax. Our antimate in 193 hours hut it	minht have been well heuroof that o	un in 150 hours or nechans of	shifty large than 100 hours?													
If seems to us that ACE has limited understanding of how com	onley time consumit	n and challenninn it is to describe	summary of and by an international of	onepiretion. The amount of data on	unity disertors have to conside	the rejection of it and making	I coherent and concin	na for auxiliators in their	ir namusaniani from ir autramatu ist	hodour'									
					,														
. Was this number of staff hours fewer, about equal to, o	or more than the n	imber you expected to spend it	n the evaluation process?

The problem with not having enough time, was the general rev	view process taking	slace in the summer period when i	ur main person working on it had 2 wee	iks off. I suggest that being in the su	immer and most staff in organ	zations take periods off, the pri	ocess should last a co	supile of weeks more."											
Some of the information was factually incorrect and required m	nany hours on our s	de to weed through why this was t	e case and rectify it. The timelines to gi	ive documents were far too short at a	every stage particularly the fir	al approval which I think was o	one working day. The e	rvaluation itself was not	t clear or transparent about the ra	ationale for the decision,	it took multiple emails to	to understand it."
