joe_soap	Negotiation Sandbox	5/17/2018	4:30 PM	5:45 PM	Georgia 13	Negotiation is one of the most important elements of consensual kink. Often we build this skill by making mistakes and dealing with their unfortunate consequences. In this participation-based workshop we will stage mock rope pickup play negotiations then discuss their results and potential pitfalls without the pressure or risk of an actual scene. Although rope will be used to focus our examples, the lessons should be broadly applicable to other types of negotiation, from the top or bottom. Attendees of all experience (or inexperience) levels are welcome.
IPCookieMonster	Bridging the Communication Chasm Between Rope Tops and Bottoms	5/17/2018	6:00 PM	7:15 PM	Georgia 13	Riggers usually say that the most valuable skill for a rope bottom is good communication. However, there are serious challenges to becoming a skilled communicator as a rope bottom. These include subcultural shame around “topping from the bottom” and the fact that almost all of the vocabulary of bondage was created by riggers to talk about their priorities—which are frequently not the priorities of rope bottoms. In this workshop, we’ll work together to look for better strategies to help rope tops and bottoms communicate with one another to create mutually satisfying experiences.

Lady_Leigh	Importance of Calling Colors	5/18/2018	11:30 AM	12:45 PM	Room 125	A huge part of open communication is being honest in a scene and calling colors when needed. Safewords are there for the safety of both Tops and bottoms. Most submissives/bottoms hate to use yellow, red or other safeword for fear of disappointing the Dom or Top. They don't understand that its for their safety, that they control the scene. This discussion is aimed at this misconception and covers in depth the need for using colors to protect both the sub/bottom and Dom/Top during a scene. How often do you find that someone can actually read your mind and tell what you need or want and when you need or want it? Me either! That is why open and honest communication is so vitally important in relationships and especially in a D/s dynamic. This discussion will encompass how to open up, how to tell your Dominant or submissive what you need and want. How to have those difficult discussions that delve deep into your kinky side.

However, are we utilizing them to their fullest potential (no pun intended)? Let's think beyond the diaper as an object itself and identify its meaning as a symbol, and from that determine how it is represented in our mental connections. Strict Dave	Floggers 101	5/18/2018	2:30 PM	3:45 PM	Ballroom South	<p>Floggers are among the most popular, versatile, and iconic of BDSM implements. With a tremendous range of materials and construction available, there is a flogger for just about any preference. Couple these myriad options with diverse methods of using them and floggers can deliver sensations anywhere on the spectrum from relaxing massage to not-for-the-squeamish extreme severity. Mild flogging is often an excellent choice for warm-up, warm-down, respite from heavier impact play, rewards, etc. Heavier flogging can provide the high intensity of sensation suitable for pain junkies, corporal punishment, and marking skin.</p> <p>This class will cover the basics of flogger selection, usage, and safety. In addition to practical demonstration, the class will include quite a lot of information, so participants who are so inclined are encouraged to bring a notepad and pen. The goals are for class attendees to become familiar with the various types, materials, and construction of floggers, to understand how these characteristics affect flogger handling and sensation, to be able to navigate the dizzying number of selections available at vendor fairs and online, to understand the fundamentals of handling floggers and how to practice effectively, to know the major target zones on the body as well as areas to treat with special care or to avoid altogether, and to be aware of other safety and hygiene considerations associated with flogging.</p>
Trinity	The Year of Living Uncomfortably (YoLU)	5/18/2018	2:30 PM	3:45 PM	Georgia 9	<p>Living is easy. Living uncomfortably is hard. Fear and discomfort often cause us to make the easy choices in life, but it is when we face difficulty and when we overcome fear that we grow. I made a conscious decision at the beginning of 2010 to live uncomfortably. That one stopped in 2014 but has restarted (with a frightening vengeance!) in 2017. While it's been difficult sometimes, I've found myself growing and becoming more comfortable in my own skin in ways I wouldn't have thought possible.</p> <p>This gathering is going to be more of a round-table discussion focusing on how we face our fears, process our discomfort, and step outside our boxes in order to live uncomfortably. If you're embarking on a new chapter of your life or simply want to force growth within yourself then this round table is where you want to be. Come out, listen, share, and live uncomfortably with us!</p>

Mistress J and male	24/7 Power Exchange	5/18/2018	2:30 PM	3:45 PM	Georgia 3	<p>If you were to peek into our windows you would see vanilla life occurring (both a high school and college student still live in our home) but we are inviting you inside. You will see something different from Stan and Susie Smith's house. I sleep in while Male wakes at 4:30 AM to complete his cleaning chores. He walks and feeds the dogs, writes in his journal, presents himself, still wearing his kilt. He services me...whatever I want, whether massage or sexual pleasures. Coffee is placed on my bedside table as he gets ready for his day. Last thing he does before leaving is kneel before me, head bowed, collar in hand, waiting patiently for me to clasp it.</p> <p>Come hear our David Letterman style "Top 10" 24/7 basics.</p>

LuggageMonkeys	Primal Play: Slipping into your Own Skin	5/18/2018	4:00 PM	5:15 PM	Georgia 9	"But how do you do this? How do I explore primal play? What if I turn into an enormous green rage-monster?" If you're asking these questions, or curious about primal play, this class is for you. Even if you don't identify as a primal! See, primal play often overlaps with "primal" as a role, but the two are very distinct. Yes, you can do it (and enjoy it!) however you identify. It can be affectionate, or violent, or sexual, or soft and sensual. It all depends on what you carry into the woods. LuggageMonkeys and LotusLane will show ways to explore primal play, however you identify. They will cover highlights and screw-ups from their own experience, and give starting points to build your own. Consent, safety, negotiation, and etiquette will be covered (in case you look for such things in Frolicon class descriptions). At the end of the day, when "the sun's getting real low," we're all consenting adults. The beasts inside us can be as fierce or cuddly as we want.

Pup Emrys	Pup Play 201	5/19/2018	11:30 AM	12:45 PM	Georgia 11	<p>In this class, our focus will be less on the activity of puppy play and more on being a pup as an identity and a role within the community. We will discuss the rewards of being a pup or Handler, what it means to be a 24/7 pup, breeds, pet names, pack dynamics and the roles of Alpha and beta pups, the rapidly growing puppy community (including the emergence of straight and female pups in a traditionally gay scene), and the acceptance (or not) of pups by the traditional, Old Guard-ish Leather community.</p>
Strict Dave	Spanking 201	5/19/2018	11:30 AM	12:45 PM	Georgia 5	<p>Have you attended plenty of basic spanking classes and now you're wondering "what else"? Have you spanked your play partner(s) plenty and want some new ideas? Do you think of spanking as a beginner activity or "BDSM Lite"? If you answered 'yes' to any of these questions, then this is the class for you.</p> <p>Far beyond being the simple act of smacking a girl's bottom, in my life spanking serves as a linchpin for a wide range of dynamics, interpersonal energies, and role-play scenarios. For me, it is not only a wonderful and enjoyable activity on a visceral level but also a gateway to more spiritual experiences.</p> <p>This class will assume that the attendee knows the basics and will cover not only advanced topics regarding technique but also communication, intention, energy, interpersonal dynamics, creativity, attention, preparation and/or spontaneity (as the case may be), empathy, intuition, and cultivation of one's own nature. Experience is the best teacher for these things, not a class, but I will give you plenty of thoughts to ponder and to keep in mind as you build that experience.</p> <p>* After the class, I will have a hands-on session and play "swing doctor" to help people with any problems, questions, or areas of stagnation that they might have. Please bring your issues and we'll see what we can do together to resolve them.</p>

Ouroboros	Queering Relationship Structures	5/19/2018	1:00 PM	1:00 PM	Atlanta 2	As kinky people we resist, reject, and criticize mainstream norms of sex and intimacy. But as communities we have solidified identities that carry new expectations and limitations, especially around how our relationships take shape. In this discussion we will explore how many of our new values and norms can limit us personally, how our community discourses create hierarchies of identity, and how vestigial elements of mainstream culture linger in our values. Most commonly associated with gender studies, queer theory dismantles categorical thinking and helps reveal insidious systems of social control. Here we will employ this perspective to challenge the new walls we have built around ourselves.

This class will provide a loose "how to" guide to help simplify the complexities of emotional masochism. We'll discuss what emotional masochism is, how it can manifest itself, ways to safely explore it, and tips to use when searching for matching partners.

We will practice timing ourselves in several moderately stressful positions to learn how to predict and manage ourselves in those positions. Afterwards, we will work on developing more sophisticated communication skills for intermediate bottoms. This will primarily be accomplished through an exercise we'll call the Massive Overcommunication Challenge in which bottoms basically give their tops a stream-of-consciousness account of everything that is happening sensation-wise as they are being tied, and in which they practice estimating how long they have "left" in various positions. You will want a demo top for the second half of class.

Lady_Leigh	Sensation to Subspace withOUT Impact	5/19/2018	2:30 PM	3:45 PM	Room 127	<p>You know that awesome trip to subspace you take when you've had your endorphins go sky high from an intense flogging or other impact scene? Did you know you can do the very same thing without impact at all? Yes you can! You can go to subspace with nothing but sensation play. Learn how to enjoy all the different sensations and fun implements you can use to heighten the experience for both top and bottom.</p> <p>This demo shows how important touch can be to both Dominant and submissive in all aspects of the relationship as well as how that touch and sensation can lead to a very deep subspace. Yes you can put a sub completely in subspace with absolutely zero impact. How to use the toys you already have in different ways for the textures they produce along with your hands to create a scene with intense energy.</p> <p>Sensation play can be a lot of things. Everything we touch has a texture, a different feel. Sensation play is to use all the parts of toys in ways other than which they were designed to be used. It's a push and pull of soft and hard, rough and smooth, sharp and gentle. It's builds to an amazing sub space.</p> <p>This is one of my favorite classes to teach, to watch the awe on faces when they see what can be done with absolutely NO impact! Having someone say to me "an hour ago I would have told you that wasn't possible" inspires me. To take a sub who thinks they need a lot of pain and show them sensation only and achieve that awesome trip to subspace is beyond words.</p> <p>This demo goes over how to use the toys in your toy bag in unconventional ways - use a flogger for creating a rain affect down the back or the texture of the handle - everything in the arsenal is used in a different way to create maximum sensation. For those that believe they need massive amounts of pain or that it can't be done, this shows them that yes it can be done and we tell them how to accomplish all sorts of sensual and sensation play into their scenes to spice up their kinky play time.")</p>

Nessiance	Top Drop	5/19/2018	2:30 PM	3:45 PM	Georgia 3	Tops & Doms - you are doing most of the work, so why is all the talk around here the Subbies and THEIR selfish needs and desires? Are you tired of giving aftercare when your flogging arm is exhausted? Ever had a sniffly bottom complain about your expensive toys? Come on, let's start with some science and sociology; then shift to ways for us to deal with burnout and boreDom; then share tips and tactics so we can keep having fun while we keep the Subbies in their place (and in their cuffs). Bring your sense of humor and stories too!
Pup Emrys	Puppy Mosh	5/19/2018	2:30 PM	3:45 PM	Georgia 13	Puppy play is the fastest growing segment of the Leather/BDSM community. A puppy mosh is basically a dog park for human-dogs. There's lots of chasing, pouncing – maybe some humping – and it usually all ends in a big cuddle pile. There will be balls, bones, treats, squeaky toys, petting, and scratches! Come attend the event as a pup or Handler or just a spectator.
Strict Dave	Canes & Other Rods	5/19/2018	2:30 PM	3:45 PM	Georgia 4	<p>Rods have been used for disciplinary purposes for thousands of years, a classic punishment implement if ever there was one. They are still daunting and devastatingly effective for that purpose, but they can be amazing for recreational play as well when applied more moderately. They impart a sensation that is quite unlike any other, one that many bottoms find addicting and can induce marvelous headspace/subspace/endorphin space. The twin parallel "tramlines" that they leave are distinctive and gorgeous.</p> <p>This class will cover many different types of rods, especially canes. Subjects will include selection, care, hygienic concerns, the handling and impact implications of various physical characteristics (length, width, flexibility, material, etc.), the notoriously difficult issue of symmetry, and more ideas for usage/application than you might have thought possible.</p> <p>If you have any questions about your own canes or other rods, if you have one that you find troublesome to use, or if you have one that you think might be worth sharing with the class, please bring them along. After the instructional portion of the class, I will be happy to help provide individual assistance.</p>

As long as you are conscious of range of motion, circulation, and major artery placement, you can make up pretty much anything that you want with rope. In this class, I will demo an example of a chaos ground tie where I play the 'does it suck yet' game, adding one rope at a time until my bottom declares that it sufficiently sucks.</p>

Note: This is not a 101-level class, and for safety basics I recommend you attend a class on cuttings.
