Assetto Corsa v1.16 Mods Spreadsheet

Maintained by Eptstolius 2015-2020

A collection of modifications and additional user created content I can recommend you to take a look at. No endorsement. No guarantee for availability.

I have no oversight and am not responsible for the linked modifications, their legality and any damage you do to your system by downloading modifications or modifying your game. Only download files from trusted sources. Install mods into your Steam installation folder, not Documents (or use a mod manager if available).

Note that complex in-game Python apps can have a significant impact on your framerate if you already have a high CPU load (test with Ctrl+H to turn off all apps at once). Potentially CPU-heavy apps are marked.

[1] P/MY -- Production/Model Year of car in-game if known.

[2] Specific engine power/torque output kw/1000cm³. NA engines above 73.55kW (100PS)/l are considered very high performance. >200Nm/l is very volume efficient

[3] Transmission, gear count/type.

MT = Manual

AT = Automatic

SQ = Racing sequential

[4] Drivetrain configuration:

Front/Mid/Rear Engine + Front/Rear/All Wheel Drive

FF/FR/FA

MF/MR/MA

RF/RR/RA

[5] Kerbweight in kg -- sometimes unclear, should be Unladen weight (EC) unless stated otherwise.

[6] Weight to power ratio in kg/PS (or bhp)

[7] Percent weight distribution front/rear, manufacturer-quoted or calculated with dev app in-game (flat plane)

[8] Length/Width/Height in mm.

Width without mirrors, if data available.

[9] mm
