## Notes (IMPORTANT, READ FIRST):

Sometimes there may be decently sized holes in the sheet, this is because of compensation mode.

Compensation mode means that if there are no calls for 3 days, you get compensated 3 days + all upcoming days without calls.

This is because our backend automatically detects a bad market, and refrains from posting calls in that period, this means that some months might have 30 calls, some even might have 0 calls, but all days will be compensated

Everything before 08/2022 is from our closed beta group for select users, no screens were made as everything was manual.

Feel free however to ask screenshots from any trade in that period and i will send you a screen from our backend.

We add new strategies over time, so each month might contain coins that were not there in the months before or after.

We always use x10 leverage in the sheet, make sure to check what a good risk management strategy for you would be.

Max SL is 5% (50% with x10, so 50% of the amount you put in a trade) PNL, we also change SL manually in the calls from time to time if we see a better SL.

## TABS AT THE BOTTOM FOR FULL LISTS OF ALL TRADES

All:	Profit (PNL) all:	Calls:	Wins:	Losses:	Accuracy:
x	1877,00%	130	106	24	85%
Month (yellow = in progress):	Profit (PNL) all:	Calls:	Wins:	Losses:	Accuracy:
10/2022	75,00%	9	7	2	x
