				Case Closed.Closed date : 2023-06-12 14:51:52.43Case NotedThank you for reaching out to us with your issue. We share your concerns about making the City streets safer and we recently revised our speed hump program so that neighborhoods can receive them more quickly. We aim to slow traffic to make every street in the City safer and more comfortable for walking, biking, and rolling. A map is available on boston.gov that shows which streets in the City will receive speed humps during the first three-year phase of construction. We will continue to update the map as new phases of construction are determined. We plan to design and build speed humps in about ten areas each year for the next three years. This is approximately 500 speed humps per year. Streets with more than two lanes, major roadways, and streets with MBTA bus routes will also not be eligible for speed humps. Some streets that are hilly or curvy will not get speed humps. We will continue to work to slow traffic and offer safety interventions across the City of Boston. Streets have been prioritized based on a series of criteria that promotes the safety of all street users. We evaluated each area for its safety history, demographics (higher numbers of children, older adults, and people with a disability), if there are parks, schools, community centers nearby, plans for repaving and ramp construction, and needs otherwise identified by the residents of the neighborhood. We will work to continue to scale up our capacity as quickly as possible. Thank you for contacting 311 and BTD.

The team is designing and building speed humps in about ten areas each year for the next three years. There is a schedule for this work and a plan to address and add the speed humps to neighborhoods during the allowable construction seasons. This is approximately 500 speed humps per year, adding over 80 miles of street humps in every Council district. I have shared your concerns with the team. We appreciate your patience during the waiting period, and please do not be discouraged. Speed humps are a standard tool for safety on our streets, and the team is diligently working towards implementing these solutions. Alexander and Magnolia Street will be planned for speed humps in the next few years based on our criteria. Just so you know, Final eligibility and placement will be determined during the engineering review. We are glad we can bring this important safety intervention to your area. -FO	Case (SR) Type: [Miscellaneous] Referred To: [Boston 311] Description: [Requesting speed bumps or raised sidewalks for Alexander and Magnolia streets, Dorchester MA. 101005231736	1/1/24 6:17 AM	[NULL]	Open	[NULL]	What is the nature of the problem? [Constituent states "The primary issue I am facing is related to the narrow driveway at my residence. Unfortunately, many motorists seem unaware of its existence, leading to dangerous situations each time I enter or exit. The proximity of neighboring cars parked near the driveway entrance obstructs visibility for both me and approaching motorists, posing a significant risk of accidents.I have identified several suggestions that, if implemented, could greatly enhance road safety in our area.Parking Regulations: I propose enforcing regulations preventing cars from parking within 10-14 feet of driveway entrances. This could be achieved through the addition of street signage or painted road indicators.Bus Stop Improvements: As there is a bus stop in front of 87 Blue Hill Ave, I suggest painting (or repainting) the bus line and extending it to the front of my house at 85 Blue Hill Ave for better visibility and safety.Speed Bumps: Installing speed bumps between 85 and 87 Blue Hill Ave would help deter motorists from driving at dangerously high speeds in our neighborhood.Crosswalk and Signage: Adding a crosswalk with visible signage near the bus stop would enhance pedestrian safety and benefit our entire Blue Hill Ave community.Bike Lane Conversion: Consider converting curbside parking into a bike lane, aligning with the commendable efforts of the city and the mayor's office to expand bike-friendly infrastructure.I believe these measures will not only address my concerns but also contribute to a safer environment for all residents and visitors in our neighborhood.]	Transportation General Request	BTDT_Administration	Roxbury	85 Blue Hill Ave, Roxbury, MA 02119	7	No SLA Open	Constituent Call
