

| name | UČO | team | suggested topic - you don't need to fill this now, but you should have at least a rough idea by the end of the second module |
|--------------------|--------|------------------------|--|
| Dubný, Richard | 449922 | We are together | We want to find if the structure of hatred against different political and social groups is similar across people identified as left-wing and right-wing or conservative and progressive |
| Fikřlová, Jana | 460046 | We are together | We want to find if the structure of hatred against different political and social groups is similar across people identified as left-wing and right-wing or conservative and progressive |
| Hubatková, Simona | | Provisional team name | We want to use the GAD data. The data are longitudinal, so we were thinking about investigating the differences in the strength of the edges between the two waves of data collection. Specific hypotheses or exploratory aims will be further specified. ;) |
| Hubatková, Petra | 469195 | Solo me nihil mensuro! | We're considering attachment data (ECR or ECR-R-16). Most likely, the data will be cross-sectional. |
| Kremeník, David | 471324 | Provisional team name | We want to use the GAD data. The data are longitudinal, so we were thinking about investigating the differences in the strength of the edges between the two waves of data collection. Specific hypotheses or exploratory aims will be further specified. ;) |
| Kvardová, Nikol | 450512 | Provisional team name | We want to use the GAD data. The data are longitudinal, so we were thinking about investigating the differences in the strength of the edges between the two waves of data collection. Specific hypotheses or exploratory aims will be further specified. ;) |
| Marková, Stefanie | 509574 | We are together | We want to find if the structure of hatred against different political and social groups is similar across people identified as left-wing and right-wing or conservative and progressive |
| Paříšek, Petr | | Provisional team name | We want to use the GAD data. The data are longitudinal, so we were thinking about investigating the differences in the strength of the edges between the two waves of data collection. Specific hypotheses or exploratory aims will be further specified. ;) |
| Pampurová, Terézia | 516123 | Solo me nihil mensuro! | We're considering attachment data (ECR or ECR-R-16). Most likely, the data will be cross-sectional. |
| Rudolf, Patrik | 471245 | Solo me nihil mensuro! | We're considering attachment data (ECR or ECR-R-16). Most likely, the data will be cross-sectional. |
| Stašková, Andrea | 428213 | Solo me nihil mensuro! | We're considering attachment data (ECR or ECR-R-16). Most likely, the data will be cross-sectional. |
| Tančoš, Martin | 446083 | We are together | We want to find if the structure of hatred against different political and social groups is similar across people identified as left-wing and right-wing or conservative and progressive |
| Jabůrek, Michal | | | |
| Straka, Ondřej | | | |
| Šromová, Veronika | | | |
| Veselá, Anna | | | |
| Gulec, Hayriye | | Provisional team name | We want to use the GAD data. The data are longitudinal, so we were thinking about investigating the differences in the strength of the edges between the two waves of data collection. Specific hypotheses or exploratory aims will be further specified. ;) |
