See below for a standardized set of questions that we can use as a starting point for our initial calls - this way we can keep consistency of information captured regardless of who actually is driving the call.

Why are you interested in using Futarchy?
How many proposals do you expect to have per month
What do you currently use for governance
How many active users do you expect to participate?
What will your first proposal be?

Would you use the current build?
What changes do you need to start using faas?

Costs+Budgeting
What kind of costs would you expect after the pilot?
Do you have an internal team that can work on maintenance?

Things we need from the potential futarchy
Name
Token Address
Logo SVG
Fail/Pass logos
metadata?
Min token amount
create devnet version of token
