** The 3B primary care expenditures include recoupments from primary care providers for a single payer.

Additional Notes:

Total medical expenditures do not include pharmacy spending.

Kaiser Permanente and Denver Health are not currently subject to the required targets for primary care investment established through Colorado Regulation 4-2-72 due to their unique integrated payer-provider systems.

Notes:

Total medical expenditures do not include pharmacy spending.

The 3B primary care expenditures include recoupements from primary care providers for a single payer.

Kaiser Permanente and Denver Health are not currently subject to the required targets for primary care investment established through Colorado Regulation 4-2-72 due to their unique integrated payer-provider systems.

* Some active medical claims submitters to the CO APCD were exempt from submitting an APM file because the carriers do not currently provide APM payments to providers. Expenditures for these carriers is sourced from the CO APCD.

** UnitedHealthcare expenditures are sourced from both APM submissions and the CO APCD. The two sources represent mutually distinct populations.

Additional Notes:

Total medical expenditures do not include pharmacy.

Value-based APM arrangements do not include risk-based payments and capitated payments not linked to quality (3N and 4N categories respectively).
