	<p>NB It is important to note that while ballot boxes from polling stations located in each individual Scottish Parliamentary Constituency were allocated to/counted in the same zone, this was not the case for postal ballots. These boxes were simply distributed evenly across the three counting areas and any box could have contained postal votes from voters in any of the three constituencies. Postal ballots accounted for 22.3% of all votes cast. Accordingly the above figures can only provide a broad indication of voting outcomes in each of the three constituencies.</p>			
	<p>It should also be noted that there are areas of two of the constituencies (Renfrewshire North &amp; West and Renfrewshire South) which do not lie within the Renfrewshire Council area and accordingly the above figures relate only to voters within Renfrewshire.</p>

	<p>It is important to note that whilst ballot boxes from polling stations were allocated and counted by area this was not the case for postal ballot papers which were simply distributed across the four counting areas and each box would have contained votes from any area. Postal ballots accounted for 16.78% of all votes cast (i.e. 37,418 votes). Accordingly, the above figures can only provide a broad indication of voting outcomes in each of the areas.</p>
