Solving The Omen Dogtag

"Dulce et decorum est pro patria mori"

Start by getting the Infiltrator kit from the ship docked on the bridge. The kit will spawn in the pre-round, but only after five minutes.

Take the kit to the watertower on the opposite side of the map, on shore, and climb to the very top. There you'll get your morse code.

Once you've decoded your morse, put the letters you have into the chart below (discord.gg/bfee can help with the decode)

Phrase	D	U	L	C	E	E	T	D	E	C	O	R	U	M	E	S	T	P	R	O	P	A	T	R	I	A	M	O	R	I	
Your Message																															
Missing Letters	D	U	L	C	E	E	T	D	E	C	O	R	U	M	E	S	T	P	R	O	P	A	T	R	I	A	M	O	R	I	

Once you know which letters of yours are missing from the entire phrase, put your missing letters into the chart below.

Then convert your letters to numbers using the chart below.

Your Missing Letters																															
Numbers																															

Next, convert your numbers into morse. <https://morsecode.scphillips.com/translator.html> is a good site for this.

Finally, input the morse into the generators. Dots are on, dashes are off.

Each number corresponds to each group of generators. Start in building one, go left to right. Then go to building three, left to right.
