Type of Provider	Name	Description	API Doc Link
Foundational Model Provider	**OpenAI**	OpenAI is a research organization that focuses on developing advanced artificial intelligence technologies. It aims to ensure that artificial general intelligence (AGI) benefits all of humanity. OpenAI is known for its groundbreaking work in natural language processing and has developed AI systems like GPT (Generative Pre-trained Transformer).	https://platform.openai.com/docs/api-reference
	Anthropic	Anthropic is an AI safety and research company that focuses on building reliable, interpretable, and steerable AI systems. Their work centers on understanding AI systems and ensuring they behave in ways that are aligned with human intentions.	https://docs.anthropic.com/claude/reference/getting-started-with-the-api
	MistralAI	Mistral AI is a French startup that aims to bring open models to state-of-the-art performance.	https://docs.mistral.ai/api/
	Google Gemini	Gemini is Google's largest and most capable AI model.	https://ai.google.dev/docs
	Together.AI	Together AI is a cloud-based platform designed for constructing open-source generative AI and infrastructure for developing AI models.	https://docs.together.ai/docs/quickstart
	Fireworks.AI	Commoditize AI infrastructure for PyTorch to accelerate product innovation and disruption	https://readme.fireworks.ai/docs/quickstart
	Replicate	Replicate is an AI company that makes it easier for developers to run machine learning models. It allows users to discover and experiment with open-source models and provides a platform for sharing and deploying AI models.	https://replicate.com/docs/reference/http
	Anyscale	Anyscale provides a platform for developing and scaling AI applications. It allows developers to build and run distributed applications, particularly those that require significant computational power, like machine learning and AI, with ease and efficiency.	https://docs.anyscale.com/
Audio and Video Related	**HeyGen**	Generative AI video platform with customizable AI avatars, right from your browser	https://docs.heygen.com/docs/quick-start
	Resemble.ai	Develops AI-powered synthetic voice technology, enabling the creation of custom voice models for various applications.	https://docs.app.resemble.ai/
	Gemelo.ai	AI Clones and Agents that scale your voice, interactions, and business	https://docs.api.gemelo.ai/reference/about
	TwelveLabs	Twelve Labs is making video foundation models accessible via APIs to empower businesses and developers to build intelligent video products.	https://docs.twelvelabs.io/reference/api-reference
	Livekit	Provides real-time audio and video APIs, allowing developers to integrate live interactive streaming capabilities into their applications.	https://docs.livekit.io/reference/server/server-apis/
3D Asset Generation	**Luma**	Luma AI is a generative AI startup that enables users to transform text descriptions into corresponding 3D models	https://docs.lu.ma/reference/getting-started-with-your-api
	Inworld.ai	Specializes in creating AI-driven characters for virtual environments, enhancing interactions in games, VR, and other digital spaces.	https://docs.inworld.ai/docs/tutorial-api/
RAG and Agent Framework	**Langchain**	LangChain enables developers to accelerate their LLM application workflows by overseeing the entire project lifecycle.	https://python.langchain.com/docs/get_started/quickstart
	LlamaIndex / LlamaParse	LlamaIndex is a simple, flexible data framework for connecting custom data sources to large language models.	https://docs.llamaindex.ai/en/stable/api_reference/index.html
Vector Database	**Chroma**	Chroma operates as an AI-native open-source embedding database.	https://docs.trychroma.com/api-reference
	MongoDB	A database platform that offers a flexible, scalable, document-oriented database program which is widely used in software development.	https://www.mongodb.com/docs/atlas/app-services/functions/mongodb/api/
	Pinecone	Pinecone develops a vector database that makes it easy to connect company data with generative AI models.	https://docs.pinecone.io/guides/getting-started/quickstart
ML Observability	**Weights & Biases**	A platform that provides tools for machine learning model development, including tracking experiments, visualizing data, and managing projects.	https://docs.wandb.ai
	TruEra	An AI analytics company that offers solutions for evaluating, explaining, and improving machine learning model performance and fairness.	https://docs.truera.com/1.44/public/llm/llm_quickstart/#step-1-setup-api-keys
UI Generation	**v0.dev by Vercel**	Generate UI from simple text prompts and images.	https://v0.dev/docs
Search API	**You.com**	You.com is an AI chatbot and search engine.	https://documentation.you.com/quickstart
	Perplexity.ai	Perplexity AI is an AI-chat-based conversational search engine that delivers answers to questions using language models.	https://docs.perplexity.ai
Chatbot	**Poe**	Poe AI is a platform that allows you to create your own chatbot and engage in conversations with AI-powered bots.	https://github.com/poe-platform
