

This template may be useful to Bounty hunters that are looking for a way to manage their campaign tasks.

It is extracted from the spreadsheet I use myself.

Tip: Learn how to Sort and Filter spreadsheets to make things easier for yourself. Just google, you'll find tutorials everywhere.

This template is read-only. You need to download it to Excel, or make a copy for yourself.

All information blocks can be removed when you don't need them anymore.

I hope this is useful. If so, show some love :)

Happy hunting!
CryptRoller

<p>The purpose of this page is to have all the data that you might need to enter in a registration form in one place. It will save you time when filling out the form.</p> <p>(Delete row 1-4 when you no longer need this message)</p>

Campaign details I use status: running, waiting, done, paid, scam or crap			Useful links				Paste link to latest report here	Link to spreadsheet or report overview	Register tasks done for current period here. Use format as asked on bounty page to make it easier to paste in thread	Copy / paste older logs here if you want to keep a history	
(Delete row 1-5 if you no longer need this information)											
Campaign	Status	Bitcointalk Bounty Page	Date Joined project	Website of project	Twitter page of project	Facebook page of project	Telegram group of project	Link to Last report	Spreadsheet	LOG	History

Date to perform task Format column B is day, use reference to column A (eg: =A10)		I use X to mark completed task. You can apply filters to hide completed, but you will have to remove this information first	Mark your task here. I use: CT Custom tweet RT Retweet RTL Retweet & Like BCT Bitcointalk post REPORT Report CHECK check if bounty continues	In the Link column you could place a link to the profile page and paste the link to the task after completing it The Info column is useful to place required hashtags, info about reports (quote or single posts), etc	Name of the campaign the task is for.	
Learn how so sort and filter spreadsheets to make things easier for yourself (Delete row 1-5 if you no longer need this information)

Instead of adding single rows to the Tasks tab, it is easier and faster to create a complete task list here.
 When finished you can copy and paste it to the end of the Tasks and delete the rows in this tasklist
 Sort the Tasks tab on the Date column and you are good to go.
 (Remove rows 1-3 when you don't need this info anymore)
