- The first step in budget planning is to enter planned earnings, and planned expenses. Note: In order for the value of the account balance to reflect what we have on file, it is necessary to apply the cash principle, i.e. we enter the amount of actual income only when it arrives in the account
- In the upper right corner you can see the individual totals -> Actual income, total planned expenses and Difference. You should aim for a state where the Difference is as small as possible
- The "To look into" section tells us on which categories we have planned too little relative to the previous month's actual expenses. At your discretion, rethink the amounts planned for the current month.

Category IV - Important Expenses/whims

Planned Cost	Actual Cost	Difference
410.00 zł	0.00 zł	410.00 zł

- We plan our expenses in the right places.
- The totals from each section are also counted in the appropriate grouping categories, e.g. as above "Category IV...". The user can customize the naming as desired
- Each expense section has its own categories, which the user can customize, but then the tables in the "Technical" sheet must also be adjusted, as will be described below
- Jeżeli wydamy więcej niż planowaliśmy Difference będzie ujemna. Użytkownikowi następnie w kolejnym miesiącu zostanie przekazana informacja jak duża była to Difference.
- Category Savings/Investments is not treated as an "expense" but reduces our money to be distributed
- Note that you should have "Totals" set on subtotals. The sheet will work correctly only on these settings

Budget Plan	4,810,00 zł
Sum of actual expenses	0,00 zł
Income - actual costs-Current balance	7,922,00 zł

- the above summary gives us information about the current balance of the account, which is equal to the sum of actual income - the sum of actual expenses

- The sheet works practically fully automatically. It is only required that the user enters data regarding expenses in the corresponding calendars and their planning as was explained above. E.g. for expenses for January we complete "Calendar_01", for February "Calendar_02", etc. Note that for e

- It is very important to complete the categories, it is thanks to them that the amounts are automatically counted in the tabs of the corresponding months, and then presented in the charts as well. Completion of categories works by selecting values from a list

- The technical sheet is an important part of the file, it is where most of the data presented in the charts is collected, it also contains a list of categories that are later available to the user through a drop-down list, it also collects differences from December previous year

3. Adding new category and differences from December previous year

List of categories

Food	House expenses	Transport	Self-Care	Animals	Shared expenses, subscriptions	Loans	Insurances	Taxes	Savings/investments	Entertainment/important exp	Presents/donation
Groceries	Rent	Car expenses	Doctors	Food	ING	Personal	House	State	Property	Electronics

- To add a new category, you need to place it inside the given table in the technical sheet. Just type under the existing ones.

- When the user only wants to change the name of a category, he only needs to do it in the technical sheet. If you want to swap categories with places, you should do it by changing the names in the technical sheet in the given table. Dragging the rows does not change the order in the other tab

Self-Care

	Planned Cost	Actual Cost	Difference
Doctors		0,00 zł	0,00 zł
Medicines		0,00 zł	0,00 zł

Krawiec		0,00 zł	0,00 zł
Other		0,00 zł	0,00 zł
Subtotal	0,00 zł	0,00 zł	0,00 zł

- Then for each month, click add row for the corresponding table. Note: Do not do this by adding a row from within the sheet

December pre Planned	Differences
Food	5
House expenses	
Transport	
Self-Care	-2
Animals	
Shared expenses, subscriptions

Insurances	
Taxes	
Important expenses/Entertainment	
Presents and donations	

- In order for the user to show messages about the differences from December previous year to January current year, it is necessary to paste these differences in the appropriate places in the technical sheet

4. Good practices

- First we pay ourselves ;) -> we transfer to savings

- It's a good idea to have goals set for the most important fixed expenses such as rent, groceries, etc. As soon as we get the cash we also transfer to this

- After pouring into savings and major expenses, we dispose of the remaining amount by sticking to the plan

- It is worth planning for things like buying clothes, going out with friends, buying a new game whatever. These expenses we do not cut out, we just try not to overdo it with them

- You can also cleverly set aside for things like gifts or for a pet, in case of accumulation of birthdays of loved ones or illness of a pet we are protected ;)
