1. Go to File -> Make a Copy to add this sheet to your own Google Drive	
2. Boxes that are colored light blue are for you to fill in	Like This
3. Boxes that are colored light yellow have formulas in them	Like This
4. For each set you want to track, fill in the number of rares, mythics, and uncommons you already own	
5. Then fill in the number of packs you already own	
6. When you draft, refer to your collection tracker to see which cards you already have four copies of	
7. Remember to take every rare and mythic rare that you don't already have four copies of	
8. Put your draft results in the table for the set you're collecting, this will update the formula based on your average performance	
9. When the number of drafts needed to collect all rares goes down to zero, its time to open up all your packs!	
10. At this point you likely will not have a full set of mythic rares, so keep drafting but at least you don't have to take every rare anymore!	
11. Hold onto your packs again until the mythic rare counter also goes down to zero. You'll finish your mythic rare set and likely have a bunch of gems, wildcards, and maybe even a vault opening!
