	ore traders or just say he					@CryptoSpy			

What's going on here?

There are some twitter experts giving advice and predictions on crypto currency trading. When I entered crypto, I was chaotically subscribing to various traders and soon realized that the majority of them offer low-quality tips, exploit their followers, entice them into useless private groups and other scams. I saw lots of beginners trust the wrong people and quickly lose money. So I came to the idea of making this rating system.

How does it work?

I follow 'experts' on Twitter as @CryptoSpy. Every time I favor a tweet it automatically goes to the spreadsheet with the help of the software developed by me. Added records then wait for manual evaluation (when i have free time). This is not a real-time system in any way.

Results proof?

The Rating is completely transparent. Every trader has its own tab with his tweets and evaluations.

What is 1, 0, and -1 (+, =, -)?

Fulfilled predictions get +1, unfulfilled get -1, others get 0. Exceptional predictions may get extra points.

I would like to participate or evaluate another person!

First of all - the ratings are now well established, with the few hundred unique daily visitors, traders who are towards the top get a very nice promotion.

Each trader is assessed personally by me, I do not have a team (of trained monkeys(??:)) I can't watch every trader on Twitter, so i choose to include trending traders and maintain a ""queue"" tab. When i think the time has come - i replace some traders from the bottom of the rating with newcomers. Newcomer stats usually take about 2 months to mature, that's why the queue moves quite slowly. You can always be added to the queue just by asking me. But if you're not "trending" - you have a low possibility of being moved from queue to the rating. HOWEVER if you want to get into the rating right now - you can support my work with 0.5 BTC. This payment guarantees your immediate inclusion into the rating. You will never be excluded from the rating unless you are at the bottom of it after at least 50 ratings.

The same thing can be said about excluded participants. Having a second chance costs 0.5 BTC.

Also its possible to pay for another person (if you really want to evaluate someone).

When does prediction get "+"?

Generally - when it helps to make some profit or save money. Prediction may be not 100% accurate.

I've lost all my money on pump&dump but the prediction gets "+", why is that?

Prediction was made long before the peak price. It's your responsibility to leave pump at the right time.

When does prediction get "-"?

When it leads to a money loss or a huge opportunity miss.

When does prediction get "="?

All other favorited tweets get "=". Sometimes they are not predictions at all, but i assume them to be usefull. Or the predictions were pretty inaccurate or partially fulfilled (but didn't cause a money loss).

What is "noise"?

Useless tweets that waste our time.

I'm an expert and i got unfair "-". What should i do?

PM me. I'm open to communication. But if you tweet something like "Bitcoin is going to 550" - don't say that it was long-term prediction afterwards. Your readers are not psychics. I treat it as short-term. Everything that is not completely clear is not going to be treated in your favor.

My super prediction was not counted!

Retweets, replies, unclear messages are not evaluated.

Where can I discuss it?

	new addition to the alt portfoilio: BOOST, the first x13 coin, on bittrex. x13>x11 am i right? :D https://t.co/rvV0RBEIHD		BOST	1 https://twitter.com/ActualAdviceALT/status/471232816831672321
	so as you guys getting into ZC have probably noticed, there are some pretty large sporadic dumps,, no reason to market buy to get in			0 https://twitter.com/ActualAdviceALT/status/471317421668589568
	yeah,,, so, usually I just tweet where the positive action is, but I think it has to be said that XC is in the irrational exuberance zone the 4 tiny caps I called last week are top 5 on bittrex volume now. how long til larger exchanges notice BOST & ZS? http://t.co/osWZC52AWa		dub	0 https://twitter.com/ActualAdviceALT/status/471338053290561536 0 https://twitter.com/ActualAdviceALT/status/471346018399694848
	Also, w/ X11 all the rage, you guys should be keeping an eye on #boostcoin being x13., its got especially healthy volume lately (i.e. today)		BOST	1 https://twitter.com/ActualAdviceALT/status/471346139329871872
	also, lovely dip in ZS,,, see, if you had low bids you wouldve caught a good deal. No rush, multipool still week away http://t.co/dWM5l2xYGD		dub	0 https://twitter.com/ActualAdviceALT/status/471476112359301120
	soo,, I guess no1 was there when I suggested #BOST as a buy at 1.2k-2k,, might break 5k soon, maybe ppl will think its a good deal at 10k?:P tbh,, 6k is probably a little over extended for BOST atm,, theres only so much money on bittrex-skys the limit if it hits polo/mintpal tho		BOST	1 https://twitter.com/ActualAdviceALT/status/471495433374556160 0 https://twitter.com/ActualAdviceALT/status/471512627613405184
	so why did #BOST about to break 8k, maybe even 10k by tmmr? well, it just broke 100 btc volume,, on its FIRST DAY http://t.co/Z293KVnd80		BOST	1 https://twitter.com/ActualAdviceALT/status/471512627613405164
	dont be too dismissive of XSI and ZS tho,,, XSI has news (apparently), and is 3rd on https://t.co/2QW8SHIcMI , ZS has multipool next week		dub	0 https://twitter.com/ActualAdviceALT/status/471525087531638785
	So I guess if u guys bought XC with me before it went 20,000% and BOST before 1500%, u can forgive me the RTC? Sorwie I couldn't TA devs.:			0 https://twitter.com/ActualAdviceALT/status/471539778152693760

	well, i guess i bought more BOST on that dump >_> still another week of POW? hey what do u call that three sided geometric shape thing forming on BOST? @DJThistle01		I said 400 (hit 497: >1% off). Then called 336 (hit 338: >1% off) and it bounced for a nice daytrade to 353, 300 to be challenged, #bitcoin				https://twitter.com/DJThistle01/status/518496719873785856
