*Re Thailand:			
The Australian Bone Marrow Donor Registry (ABMDR) is currently the initial contact point for the donors recruited in Thailand. Thai donors are hosted on the ABMDR database. Please contact the ABMDR for requests for match lists and service requests (typing, requests for workup etc.). The Thailand Stem Cell Donor Registry can be contacted directly for information on how requests are proceeding. All workup and transport issues are communicated directly with the Thai Registry. All requests for cord blood units, including match lists and service requests should be sent directly to the Thai Registry.
