- [1] Models that aren't cleaned or set up in any way, but are models that are available to do so.
- [2] Models that are partially set up but not optimal for animation.
- [3] Models that are usable but not fully tricked out with features.
- [4] Models tricked with features that make them easiest to use, or models I consider to be feature complete at the current moment.
- [5] Models that are old and need to be updated to fit new knowledge/techniques and current standards, or models that weren't entirely finished when used in animation.
- [6] Models I want that I don't already have.
