

Pacific Crest Trail Water Report -- Northern California : Sierra City to Ashland, OR

Sierra City, CA to Ashland, OR

Updated 4:45pm 11/11/18

www.pctwater.com

See Snow/Fords page for updates on Snow & Creek crossings & Road Closures in NorCal.

Never rely on water caches!!! Beware of contaminated water. Purify backcountry water.

Send email updates to water@pctwater.com or phone/text 619-734-7289 or 619-734-PCTW [voice mail/text only, no one will answer]. Mileages and waypoint names used in this water report are from Halfmile's PCT maps [www.pctmap.net]. Please send photos & videos of water sources, fires, passes, **Poodle Dog Bush**, and stream creek crossings to our **Facebook page** called "**PCT Water, Fire, Passes, Fords Update Group**"

Take fire safety seriously. Alcohol stoves start fires – go stoveless or carry a stove with a contained fuel source and a shut-off valve.

Water sources with blue text [marked with * or **] have historically been more reliable. Sources marked with ** are more likely to have water year-round than those marked with a single *. Water described as seasonal, usually dry, early spring, etc. are less reliable.

Note: The Sierra Buttes Reroute of the PCT (starting near mile 1204) was completed in the fall of 2017. This new trail is included in Halfmile Maps, Halfmile Trail Notes and Guthook, but is not in the Halfmile Smartphone Apps. This new section of trail replaced about 4.4 miles of old trail with 6.9 miles of new trail. The PCT is now 2.5 miles longer for 2018. The new section of trail takes PCT hikers and riders past lakes and camping. Plus, it avoids the old road walk and gets you further away from vehicle noises.

N4	1310.7	1313.2	CubCreek Spring	Little Cub Spring, near sign on tree, 3/10 mile west of the PCT.	Flowing. ----- Follow trail to the left for ~0.3 miles down to an ice cold springs. It's a bit of a climb back up (~300 ft) but worth it and I would fill up here as the next water source at mile 1315.5 (Carter Creek) gave a lot of other hikers problems in 2014 in terms of finding it which meant no water between Little Cub Springs and Soldier Creek 12.2 miles ahead.	7/27/18	3rd Wheel
N4	1313.3	1315.8	TR1316	Trail junction to a spring, 3/10 mile off-trail	flowing OK	7/30/18	Asschaps
N5	1315.5	1318.0	CarterCreek	Seasonal Carter Creek, ~0.5 mile N of PCT	Both half mile and Guthook place water marker at .45 mile from PCT. Maybe early in the season. I did not find it. But if you keep walking the trail after 0.7 miles, you will see huge tree laying across the trail with the sign Water above it. Climb over the tree and 100 yards to the left is a creek. If you walk about 100 yards pass the tree, water is easy to access. ----- Many hikers in 2014 could not find any water which is 0.5 mile off the PCT. A few hikers did find water however.	6/29/18	Tripod
<p>6/1/16 (Fat Sectioner) : Currently, Carter Creek is at the point where the trail crosses Carter creek, 350 feet or so past the campsites. If one follows the path past that, it crosses</p> <ul style="list-style-type: none"> * 0.0 miles: Leave PCT * 0.4 miles: Campsite * 0.45 miles: Carter Creek Crossing * 0.5 miles: Unnamed Creek Crossing * 0.6 miles: Confluence of two creeks 100 feet to the west of the trail * 0.7 miles: Permanent (aka more than seasonal) creek about 50 feet to the west of the trail <p>*** To that end, at the Carter Meadows trail intersection on the PCT there's a sign that says "permanent water 0.7 mi". And based on what I've seen, that makes a lot of sense. However, the campsites are similar enough distance, one could easily assume that was the 0.7 miles (particularly with how off mileage can be on trail markers) and not explore further down-stream. So what I'd recommend is adding waypoint WA1316 at location 40.2027,-121.4178 (that's the 0.6 mile item on the mileage log) with the description: "Permanent water on Carter Creek, further downstream of campsite." If you'd prefer something even more substantial, you could use location 40.2042,-121.4166 that is 0.7miles downstream. At that point the flow is so strong the creek can be seen from Google Earth imagery and the USGS topo maps show another creek having joined in (although I didn't see it).</p>							
N6		1328.0	SoldierCreek	*Soldier Creek	flowing well	8/31/18	Morning Angel

Bear Canisters are now required by law when camping in Lassen National Park probably due to a aggressive bear near Lower Twin Lake (mile 1355.1) in 2016 that harrassed multiple hikers for their food. See https://www.nps.gov/lavo/learn/news/bear-canisters-required.htm for more info. 8/27/17 (Rocky & Peaks) : Warner Valley Campground at Mile 1347.8 has bear boxes for your food.

N15	1383.0	1385.5	LostCreek SpringTR	Trail to Lost Creek Spring, 3/10 mile off-trail and ~388ft descent ----- We are especially interested in water reports about this location. Please send info.	8/2/18 (Asschaps) : Flowing well. 8/1/18 (Moose) : many gallons per minute of cold clear water. 7/26/18 (Erik) : Flowing very well. 7/4/18 (Bazinga) : Can hear stream from PCT. Walking downhill switchbacks(without pack) takes 7minutes being careful of footing (good trail w/ 2or 3 awkward footing areas), uphill takes 12min. 2liter fillup took 15sec. Many gal/min flowing.	8/2/18	Asschaps
N17	1391.1	1393.6	Road22	Cache 22 ----- <i>Some hikers confused by the presence of a very large empty tank. The correct tank is at the northeast corner of the corral which is the closest corner to the PCT. It is hidden behind a wooden wall and protected from water thieves.</i> Please send in level gauge reading to help with monitoring for a refill. You can also let the Burney Mountain Guest Ranch know when the tank gets below 1/2 full and they will call to get it refilled.	9/5/18 (Morning Angel): Gauge reads full 9/4/18 (The King): Plenty of water 8/10/18 (BigBro) : tank is full, also lots of bottles (about 30 gallons). 8/6/18 (Cheryl) : Cache 22 has lots of water. 8/2/18 (Asschaps) : Cache is dry. 8/1/18 (Moose) : Cache is dry. 7/27/18 @ 7AM (Blueberry) : Cache 22 water tank gauge reading near empty. 7/27/18 @ 5:30AM (Lizard) : Cache 22 water gauge reads EMPTY as of 6/27 5:30am. Water still coming out but not for much longer. DO NOT RELY ON THIS CACHE! 7/27/18 (SB) : Cache 22 is almost empty. Not sure how accurate the gauge is, but there's probably about 10 gallons left, 20 at best. 7/26/18 (Erik) : Basically empty based on gauge and slow flow. Carry water from Lost Creek 9 miles before (flowing very well). 7/25/18 (Chante) : 1/8 capacity per gauge. 7/18/18 (Opa) : Gauge shows tank is ~60% full.	9/5/18	Morning Angel
