**Pacific Crest Trail Water Report -- Northern California : Sierra City to Ashland, OR**

Updated 6:35am 7/6/19

Sierra City, CA to Ashland, OR

www.pctwater.com

See Snow/Fords page for updates on Snow & Creek crossings & Road Closures in NorCal.

Never rely on water caches!!! Beware of contaminated water. Purify backcountry water.

Send email updates to water@pctwater.com or phone/text 619-734-7289 or 619-734-PCTW [voice mail/text only, no one will answer]. Mileages and waypoint names used in this water report are from Halfmile’s PCT maps [www.pctmap.net]. Please send photos & videos of water sources, fires, passes, Poletoad/Bush, and stream crossings to our Facebook page called "PCT Water,Fire,Passes,Fords Update Group".

Take fire safety seriously. Alcohol stoves start fires – go stoveless or carry a stove with a contained fuel source and a shut-off valve.

Water sources with blue text [marked with * or **) have historically been more reliable. Sources marked with ** are more likely to have water year-round than those marked with a single *. Water described as seasonal, usually dry, early spring, etc. are less reliable.

Note: The Sierra Buttes Reroute of the PCT (starting near mile 1204) was completed in the fall of 2017. This new trail is included in Halfmile Maps, Halfmile Trail Notes and Guthook, but is not in the Halfmile Smartphone Apps. This new section of trail replaced about 4.4 miles of old trail with 6.9 miles of new trail. The PCT is now 2.5 miles longer for 2018. The new section of trail takes PCT hikers and riders past lakes and camping. Plus, it avoids the old road walk and gets you further away from vehicle noises.

M1  | 1205.4 |     | Tamarack Lakes |       |      |             |
M1  | 1206.3 |     | Tamarack Creek |       |      |             |

</table>

8/1/16 (Fat Sectioner): Currently, Carter Creek is at the point where the trail crosses Carter creek, 350 feet or so past the campsites. If one follows the path past that, it crosses another (unnamed) creek that will later join Carter creek and have a much more substantial combined flow. To put that in a mileage log format:

- **0.0 miles:** Leave PCT
- **0.4 miles:** Campsite
- **0.45 miles:** Carter Creek Crossing
- **0.5 miles:** Unnamed Creek Crossing
- **0.6 miles:** Confluence of two creeks 100 feet to the west of the trail
- **0.7 miles:** Permanent (aka more than seasonal) creek about 50 feet to the west of the trail

*** To that end, at the Carter Meadows trail intersection on the PCT there's a sign that says "permanent water 0.7 mi". And based on what I've seen, that makes a lot of sense. However, the campsites are similar enough distance, one could easily assume that was the 0.7 miles (particularly with how off mileage can be on trail markers) and not explore further downstream. So what I'd recommend is adding waypoint WA1316 at location 40.2027,-121.4178 (that's the 0.6 mile item on the mileage log) with the description: "Permanent water on Carter Creek, further downstream of campsite." If you'd prefer something even more substantial, you could use location 40.2042,-121.4166 that is 0.7 miles downstream. At that point the flow is so strong the creek can be seen from Google Earth imagery and the USGS topo maps show another creek having joined in (although I didn't see it).

**Bear Canisters are now required by law when camping in Lassen National Parkprobably due to an aggressive bear near Lower Twin Lake (mile 1355.1) in 2016 that harassed multiple hikers for their food. See [https://www.nps.gov/lavo/learn/news/bear-canisters-required.htm](https://www.nps.gov/lavo/learn/news/bear-canisters-required.htm) for more info.**

**8/27/17 (Rocky & Peaks): Warner Valley Campground at mile 1347.8 has bear boxes for your food.**

8/14/19 Small 2nd crossing was mucky and gross and smelled weird
6/16/19 (Smalls): the patchy snow starts nobo approx 1345 mm. Pretty much solid from 1351 to like 1357 where it's patchy until gone at mm 1358.

8/8/19 (Kevin): I just packed through the CA – Old Station area mile 1368 to Burney Falls area mile 1427 and it was snow free. Washington Nick passed me having walked over the snow from the Quince area and was going to push through the snow areas past mile 1427. I used to forest service roads and jumped back on at mile 1468 McCloud river area and just saw a little snow before mile 1750 Keno road area (with potentially many more good mile ahead that I did not get to checkout). My point is that with so many hiker friendly miles of trail in Oregon and northern California, a will timed and placed south bound shot through the Sierras could be fast and enjoyable. Additionally these lower elevation areas that were great this time of the year will be hot and dry later in the year.

5/25/19 (Smalls): Water in tank.
5/25/19 (Dave): Estimated flow greater than 100 gallons per minute. Water is clear and could be heard from the trail.

Bear Canisters are now required by law when camping in Lassen National Park probably due to a aggressive bear near Lower Twin Lake (mile 1355.1) in 2016 that harassed multiple hikers for their food. See: https://www.nps.gov/lavo/learn/news/bear-canisters-required.htm for more info.
**Crystal Lake Fish Hatchery, 300 feet E of trail, water.**

---

**Baum Lake Rd**

Pass near a lake.

---

**Rock Creek Rd2**

PCT crosses Lake Britton Dam on a paved road.

---

**Cross Rock Creek on a wood bridge.**

Best access on S side downstream via stairs.

---

5/13/19 (Kevin): Important info on mile 1469 is that the intersecting road between McCloud Lake and Big Bend, CA is closed and damaged for a couple of miles around Ash Camp (it is walkable but the camp is a mess). There is a PCTA sign that says a fire closed the PCT to Castella. The sign relates to some other year and should be taken down. Where as their are lots of trees on the trail that would be a problem for horses, the creek crossing at mile 1470 looks like it needs a big chainsaw.
**Squaw Valley Creek, Squaw Valley trailhead trail junction nearby.**

6/24/19 (Larry): size of river, down 50’ steep bank, thought West Trough Creek better source, but 3 more miles. 6/21/19 (Intrepid): good flow. 5/25/19 (Kids Out Wild): Lots of water.

**South Fork of Fall Creek**

6/25/19 (Larry): many gpm, cold, first source after Squaw Valley Creek, nearly 10 miles. 5/25/19 (Kids Out Wild): Great water, flowing well.

**North Fork of Fall Creek**

6/25/19 (Larry): many gpm. 6/21/19 (Intrepid): good flow. 5/25/19 (Kids Out Wild): Heavier flow than the South Fork.

**WA1500**

Small spring

**Soda Creek**

Cross a bridge over Soda Creek Strong flow.

6/22/19 (Intrepid)

**Sacramento River**

Cross bridge over Sacramento River Strong flow.

6/22/19 (Intrepid)

**Castella**

2.0 miles SW of PCT on I-5

**Dunsmuir**

5.5 miles N of PCT on I-5

**Mount Shasta**

13.2 miles N of PCT on I-5

**Fern Springs**

Fern Springs

6/28/19 (Notsofast)

**Indian Springs Creek**

Indian Springs Creek

6/24/19 (Intrepid): Flowing.

6/28/19 (Notsofast)

**Winton Canyon Creek**

Winton Canyon Creek, wooden bridge.

6/28/19 (Notsofast): Flowing at many gallons/min.

6/28/19 (Notsofast)

**Indian Creek 2**

Indian Creek

6/28/19 (Intrepid): Flowing at many gallons/min.

6/24/19 (Intrepid): Flowing.

6/28/19 (Notsofast)

**East Fork of Sulphur Creek**

6/28/19 (Notsofast): Flowing at several gallons/min.

6/24/19 (Intrepid): Flowing.

6/28/19 (Notsofast)

**West Fork of Sulphur Creek**

West Fork of Sulphur Creek. The east fork is often better.

6/28/19 (Notsofast): Flowing at several gallons/min.

6/28/19 (Notsofast)

**Burstone Creek**

Seasonal Burstone Creek

6/28/19 (Notsofast): Flowing at several gallons/min.

6/28/19 (Notsofast)

**Popcorn Spring**

**TR1511**

Trail junction to a small spring

**North Fork Spring**

6/28/19 (Notsofast): Flowing at several liters/min.

6/28/19 (Notsofast)

**Guilty Spring**

Guilty Spring

6/28/19 (Notsofast): Flowing at several liters/min.

6/28/19 (Notsofast)

**WAT1522**

Spring 1/3 mile off-trail

PCT free of snow but the spring and it’s trail are under snow

**Picayune Spring**

Picayune Spring trail junction. Spring is 800 feet off-trail.

Flowing at ~3 liters/min.

6/29/19 (Notsofast)

**White Ridge Spring**

White Ridge Spring

6/29/19 (Notsofast): Flowing at several gallons per minute. Very good, cold water.

6/26/19 (Intrepid): Flowing.

6/29/19 (Notsofast)

**Porcupine Lake TR**

Porcupine Lake trail junction. Lake is 2/10 mile W of PCT.

6/26/19 (Intrepid): Flowing.

6/29/19 (Notsofast)

**Red Rock Spring**

Red Rock Spring

6/29/19 (Notsofast): Flowing at many gallons/min.

6/29/19 (Notsofast)

**Deadfall Lakes**

“Deadfall Lake”

6/29/19 (Notsofast): Lake is full, many gallons/min coming out of the outflow creek. Good tasting water.

6/26/19 (Intrepid): Flowing.

6/29/19 (Notsofast)

**Deadfall Creek Spg**

Seasonal Spring above Deadfall Creek

6/26/19 (Intrepid): Flowing at many liters/min. Note: there are currently perhaps a dozen small but easily collectible flows crossing the trail between Deadfall Spring and Chilcoot Creek. 6/26/19 (Intrepid): Flowing.

6/30/19 (Notsofast)

**Chilcoot Creek**

Seasonal headwaters of Chilcoot Cr

6/30/19 (Notsofast): Flowing at many gallons/min.

6/30/19 (Notsofast)

**Little Trinity Headwaters**

Seasonal headwaters of Little Trinity River

6/30/19 (Notsofast): Flowing.

6/30/19 (Notsofast)

**Little Trinity Trib**

Seasonal tributary of Little Trinity River

6/30/19 (Notsofast): Flowing.

6/30/19 (Notsofast)

**Masterson Spring**

Small seasonal spring above Masterson Meadow

6/30/19 (Notsofast): Flowing at many liters/min. Very cold, good tasting water.

6/30/19 (Notsofast)

**Dan Rice Creek**

Small seasonal spring above Dan Rice Creek

6/27/19 (Intrepid)

**WA1565**

Spring just below the PCT

Flowing.

6/28/19 (Intrepid)

No sign. Watch for short trail back to your left next to rock cairn (for NOBO).

6/28/19 (Intrepid)

**WA1566**

Small creek

Flowing.

6/28/19 (Intrepid)

**Mosquito Lake Creek**

Creek below Mosquito Lake.

Flowing.

6/28/19 (Intrepid)

**Eagle Creek**

Small seasonal tributary of Eagle Cr

Flowing.

6/28/19 (Intrepid)

**Eagle Creek Spring**

Piped spring near Eagle Creek

Flowing.

6/28/19 (Intrepid)

---

### Notes:

- **6/6/17 (Daniel):** Trail report: 1501 (Dunsmuir) to 1560 (Etna via route 3) NOBO. June 3, thru June 6. From Dunsmuir the first 15 miles are snow free. The next 10 miles are about 40% snow, and easy. The next 35 miles are about 50% snow, micro spikes strongly recommended. From roughly 1530 to 1560 you’ll need your GPS/Guthook a lot.

- **Kids Out Wild:** Lots of water.

- **Intrepid:** Good flow.

- **Notsofast:** Flowing at many liters/min. Note: there are currently perhaps a dozen small but easily collectible flows crossing the trail between Deadfall Spring and Chilcoot Creek. Good tasting water.

- **Larry:** Great water. Cold. Flowing at many liters/min.

- **Intrepid:** Flowing.

- **Notsofast:** Didn’t stop but heard it Flowing.

- **Intrepid:** Good flow.

- **Notsofast:** Flowing at several gallons/min. Many gpm

- **Intrepid:** Flowing.
