What is the GMP archive?				
In August 3305 (2019) the GMP began archiving POIs that had either disappeared due to game updates or have become less spectacular as our knowledge of the ED galaxy has grown. We have tried to identify those POIs that would probably not have been accepted if they had been submitted to the GMP today.		Forum post about the archive procedure		
How can I help?				
We might have archived something by mistake and invite you to help us by providing a second opinion on each POI. Write your name next to a POI after reviewing it. If you find that it was ok that the POI was archived YOU DONT HAVE TO DO ANYTHING. But if you find anything you feel should no longer be archived, simply make a post about it in the main GMP thread with your thoughts on why this particlar POI should no longer be archived.
