

HOW TO USE THE TOOL

- The weight column stands for the degree of importance to you. You may input decimal numbers or integers to determine the importance coefficient.
- Depending on your choice rate each option from 1 to 5,1 to 10 or 1 to 100...
- The sum of the multiplication of the ratings and their equivalent weight will be displayed on the bottom.
- Be careful while rating the options, if the criteria has a "lower better" situation rank the points accordingly so the worse situation has a lower point.
