[1] Welcome to the Redsky Character sheet beta! We suggest zooming in. If you fill in the highlighted fields, we will automatically fill in your Features and Ability Scores for you!

At this time, you'll still have to fill in the skills, inventory, attacks, and other details on your own. We're working on automating that, so thanks for your patience.

When you click the button, you may be prompted by Google to allow script access. This is just our character sheet's automation scripts doing their work: please allow access to make sure the script works properly.

Finally, if you want to import to our avrae bot (coming soon!), don't forget to share your document with redsky@terminarchbot.iam.gserviceaccount.com

- [2] Fill in your ability scores under the ability name here!
- [3] Select each of your elements! You can also pick one element to affect your Ability Scores, and one to give you a feature. You can only choose one of each though. If you choose multiple, the first selected element from the left will be used.
- [4] Click this button when you're done filling in the highlighted fields to auto-populate your features. It might take a minute, but it's worth it!
- [5] Damage Protection granted by the armor you are wearing. If you have Superior protection, put any types listed here in the Resistances section as well.
- [6] Damage Weaknesses of the armor you are wearing.
