

	Chromosomes	in decreasing order of "must do something unique for every gene"					
							You are free to edit and comment on this sheet. There is no committee, these is just a repository of ideas for how chromosomes can interact with every gene. If you have your own idea for an entry, but there is already an idea written there, you can format it as a comment on that entry.
Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Adrenaline Rush	doubles cherns	Halves power cooldown	limits how much of the cherns you get, as to not proc overdose stuff				
Alcohol Resistance							
Anaerobic Metabolism	You don't breath at all and can walk through CO2, N2O, and Plasma safely with no internals	You don't need to breath but being in air filled areas slowly heals TOX, BRAIN, and your lungs. Internals are not enough.					
Anemia							
Apidae Metabolism (bee)	When you eat sugary foods you vomit bee eggs instead of honey.	You sprout little bee wings that don't do anything. When you say "beautiful" it is replaced by "BEEYUTIFUL"					
Apocrine Enhancement (you are smelly)	Your smell reaches much further and can cause vomiting	People affected by your smell are randomly dazed.					
Blindless	You are so blind that your eyes can emit fog around you.	You are blind but you get on screen pings for nearby noises that you hear.	You are blind but you feel really good about it.	You become shortsighted.			
Blood Toxicification	Injects seriously nasty toxins into you.	Injects more of the standard toxin into you.	Gives you a button for when you want to inject toxin into yourself (so you can harvest it)				
Booster Genes	N/A?	N/A?	N/A?	N/A?	N/A?	N/A?	N/A?
Brown Note	(Injects some amount of fartonium in others affected)	Halves power cooldown					
Chameleon	You can be partially transparent while walking.	You can go invisible more quickly after stopping					
Chronal Additive Inversement (negative age)	You become a 2001 space odyssey space baby. You are effectively dead.	You gain a slight stamina boost.					
Chronic Cough							
Chronic Sneezing							
Cloak of Darkness							
Cold Resistance							
Constricted Larynx							
Corprolalia (shout random swears)							
Cranial Keratin Formation							

	Chromosomes	in decreasing order of "must do something unique for every gene"		You are free to edit and comment on this sheet. There is no committee, these is just a repository of ideas for how chromosomes can interact with every gene. If you have your own idea for an entry, but there is already an idea written there, you can format it as a comment on that entry.			
Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Cryokinesis	makes ice area big and freezes people in center	Halves power cooldown	power doesn't work on yourself and misfire won't freeze you				
Dactyl Crystalization							
Deafness							
Dermal Glitter							
Dimensional Shift		Halves power cooldown					
Diminished Optic Nerves							
Dyspraxia							
Electromagnetic Field							
Empathic Thought		Halves power cooldown					
Epilepsy							
Erebokinesis		Halves power cooldown					
Ethanol Production							
Fire Breath		Halves power cooldown					
Fire Resistance							
Frontal Gyrus Alteration Type N (nervous)							
Frontal Gyrus Alteration Type B (swedish)	Eating Fisk or making Swedish meatballs puts a little pure love and omnizine in them.	Eating Fisk or making Swedish meatballs puts a little pure love and energy drink in them.					
Frontal Gyrus Alteration Type BT (butt)	Speaking sometimes launches a random butt at the closest spessman	Sometimes your speech creates a fart noise. This is coming from your mouth so it does not trigger bibles	If you don't have a butt you immediately grow a new butt.				
Frontal Gyrus Alteration Type C (chav)							
Frontal Gyrus Alteration Type CS (comic sans)							

	Chromosomes	in decreasing order of "must do something unique for every gene"		You are free to edit and comment on this sheet. There is no committee, these is just a repository of ideas for how chromosomes can interact with every gene. If you have your own idea for an entry, but there is already an idea written there, you can format it as a comment on that entry.			
Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Frontal Gyrus Alteration Type D (drunk)							
Frontal Gyrus Alteration Type E (elvis)							
Frontal Gyrus Alteration Type F (Scot)							
Frontal Gyrus Alteration Type FI (Finn)							
Frontal Gyrus Alteration Type O (random vowels)							
Frontal Gyrus Alteration Type Q (quebec)							
Frontal Gyrus Alteration Type R (reverse)	You walk, run, and shoot backwards.						
Frontal Gyrus Alteration Type S (s m i l e)	Speaking randomly makes other people smile emote or switches them to help intent (injects pure love?).						
Frontal Gyrus Alteration Type T (Tommy)							
Frontal Gyrus Alteration Type X (random consonants)							
Frontal Gyrus Alteration Type Y (Yorkie)							
Frontal Gyrus Suspension (mute)	Makes your footsteps, screams, and farts silent too	Makes other people on your tile unable to speak too.	You are able to speak but this removes your chat noise.				
Gamma Ray Exposure	All punches send people flying but you take as much brute damage as you give.	You can't be slowed down but you take brute over time until you're near crit.	Crit threshold for losing GRE changed to -50.				
Glowy	You're a living floodlight.	You can change your glow color at will.					
Healing Touch	heals twice as much	Halves power cooldown					
Hemopoiesis Overdrive	You generate even more flipping blood and leave blood trails wherever you go	Your blood becomes coffee and somehow you don't die					
High Decay Digestion (jenkem farts)	Your fart gas comes out in a 5 square cross but you can't fart as often.	Your farts become crank gas.	You fart pure water.				
High-Pressure Intestines	BIG fart, gibs you	Halves power cooldown	makes it not gib you when empowered, not usually possible to get both though.				
High-Pressure Larynx	YOUR CHAT BECOMES EVEN BIGGER	YOUR TEXT BECOMES BOLDED					

	Chromosomes	in decreasing order of "must do something unique for every gene"		You are free to edit and comment on this sheet. There is no committee, these is just a repository of ideas for how chromosomes can interact with every gene. If you have your own idea for an entry, but there is already an idea written there, you can format it as a comment on that entry.			
Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Incendiary Mitochondria	BIG fire area	Halves power cooldown	(Immediately raises your body temp to normal if it's low)				
Ink Glands	Paint a larger area	Halves power cooldown	You can set the colour of your ink.				
Irritable Bowels	Your farts deal 1 brute to you and disorient slightly	You fart more frequently	You can't fart when on top of a bible				
Jumpy	jump twice as far, twice as high	Halves power cooldown	can't crash down even if you are fat				
Mass Emesis	Shoots out 6 squares of vomit in a line	Halves power cooldown					
Matter Eater	used to make it so you could eat large things, RIP	Halves power cooldown					
Meta-Neural Antenna	You can speak over the radio as if there are no solar flares.	You can hear over the radio as if there are no solar flares.					
Meta-Neural Enhancement	You can't be mindslaved or converted to a rev. Can't be deconverted from rev without an implant.						
Meta-Neural Haze	You walk around in a very visible but obscuring haze.	You appear naked except for what's in your hands.		You speak like you have brain damage.			
Midas Touch	can make greater variety of things gold	Halves power cooldown					
Monkeyspeak							
Motor Neuron Signal Enhancement	The chosen limb is really strong when it hits you.	The chosen limb attacks you more frequently.	The chosen limb randomly punches and trips other people.	The chosen limb can only rudely gesture at you.			
Musculature Enhancement							
Mutagenic Field							
Narcolepsy							
Natural Anti-Toxins							
Nectar Perspiration	You attract space wasps and they will sting you and everyone else.	The tiny bees sometimes create honey on the floor	The tiny bees don't sting you and sting your attackers more frequently				
Night Vision	Everyone looks like a town guard						
Obesity	You gain a button that lets you roll in a straight line like senie-the-hedgehog a bowling ball	You heal from food as if you had the survivor trait	You are still fat but you are slowed down "less" by your fat				

	Chromosomes	in decreasing order of "must do something unique for every gene"		You are free to edit and comment on this sheet. There is no committee, these is just a repository of ideas for how chromosomes can interact with every gene. If you have your own idea for an entry, but there is already an idea written there, you can format it as a comment on that entry.			
Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Optic Energizer	stronger laser	Halves power cooldown					
Paranoia							
Photokinesis	bigger light that lasts longer	Halves power cooldown					
Physically Fit							
Physically Unfit							
Polycythemia							
Polymorphism							
Radioactive							
Regeneration	You regrow limbs more quickly but if you are fully limbed a new limb can grow underneath an older limb, shoot it off, and hurt you.						
Self Biomass Manipulation		Halves power cooldown	makes you not drop items, on misfire will make you drop 1 item instead of 1 organ				
SMES Human							
Spatial Destabilization							
Telekinetic Pull	throw more items (statistically speaking :^))	Halves power cooldown					
Telepathy							
Temporal Displacement (random age)							
Thermal Resistance	Shields you from organ damage when you are only attacked with thermal damage (e.g. laser guns)						
Tinnitus							
Tourettes							
Toxic Resistance

Gene Name	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Unstable Refraction (not in the game atm, randomly turned you invisible)							
Vestigial Ballistics	BIG throw	Halves power cooldown	no damage or bleed				
X-Ray vision	See people through walls? (I don't think it does that yet?)						
Yee							
Body types	Power Booster	Energy Booster	Synchronizer	Weakener	Camouflager	Reinforcer	Stabilizer
Dwarfism							
Bioluminecent Overdrive							
Melanin Stimulator							
Melanin Suppressor							
Melanin Eraser							
Saurian Genetics							
Ossification							
Aquatic Genetics							
Blattodean Genetics							
Primal Genetics							
Bovine Genetics
