QUERYTOOL

Version: v1.3 Last update: 24-02-2024

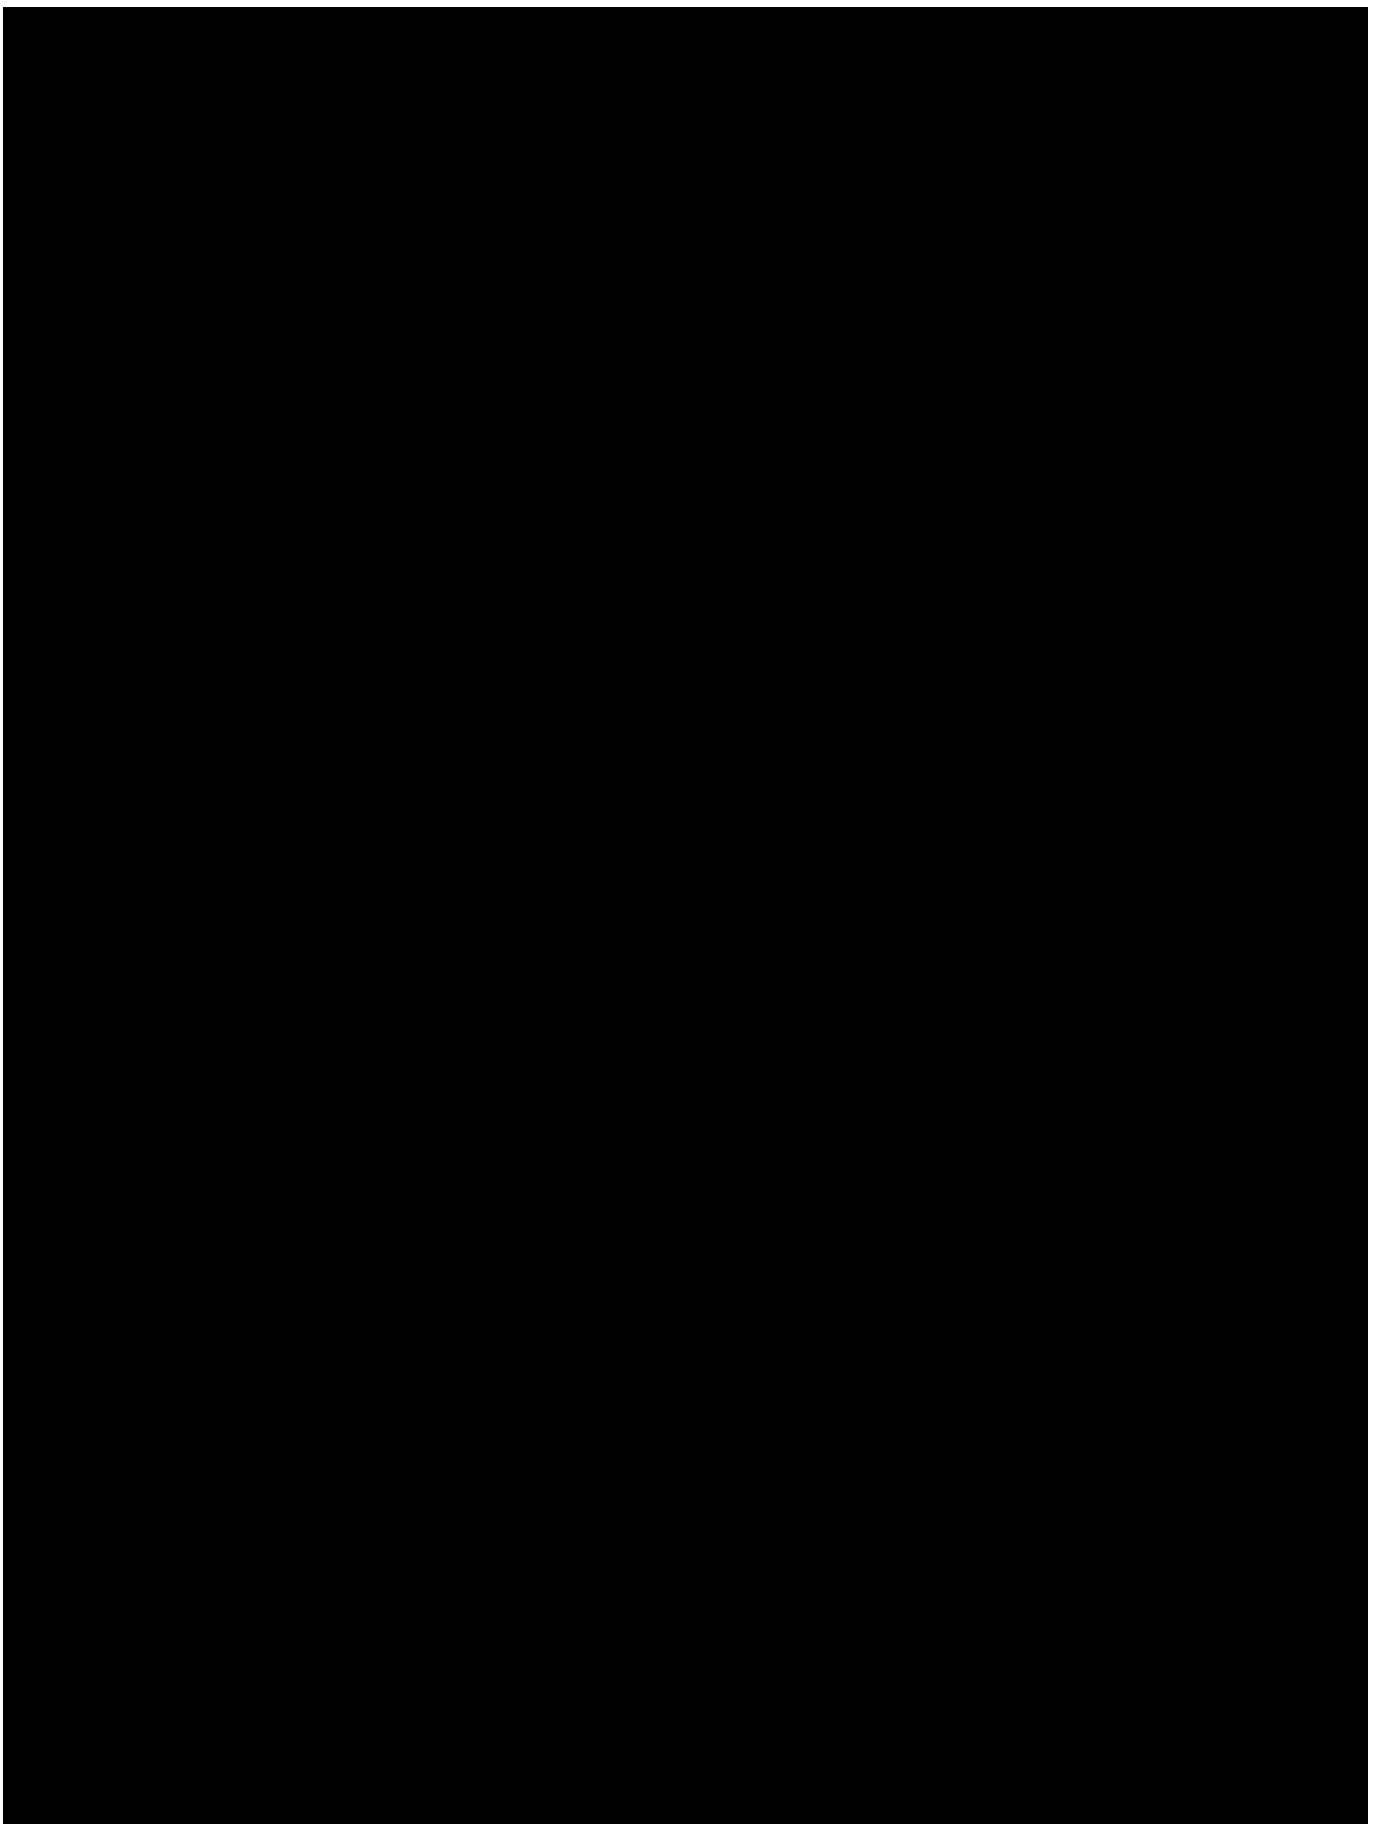

Orion's OSINT QueryTool is a Google spreadsheet-based tool. Its purpose is to optimize the search process by automating the creation of queries for selected services and tools. Using this spreadsheet, you can search and investigate people, usernames, email addresses, domains, files, cryptocurrencies and much more.

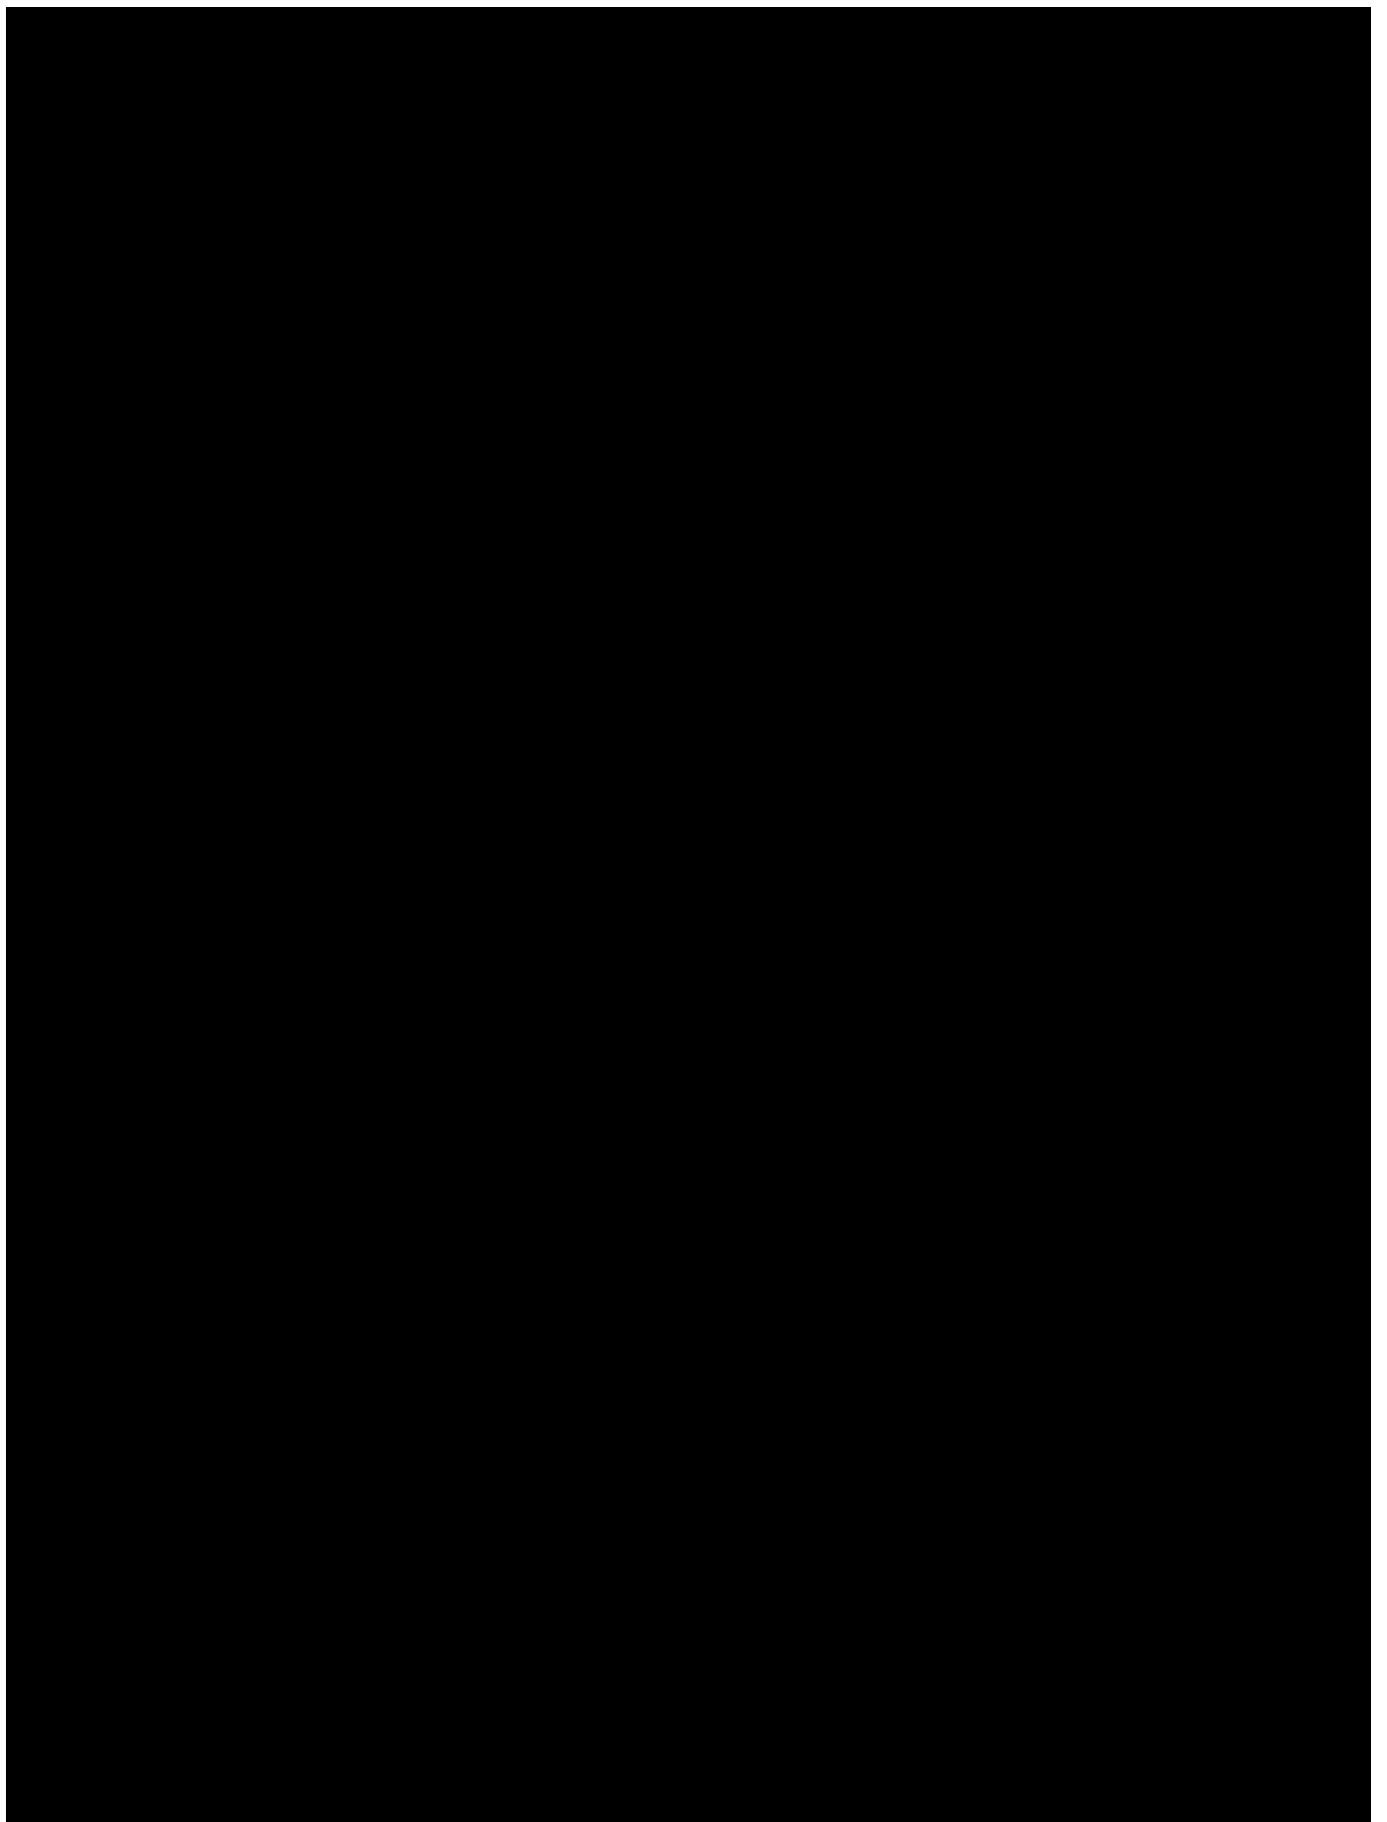

This subjective toolkit mainly includes free online services that provide quick access to search results. In some cases, a registered free or paid account is required. Such services have been marked with a key or dollar symbol.

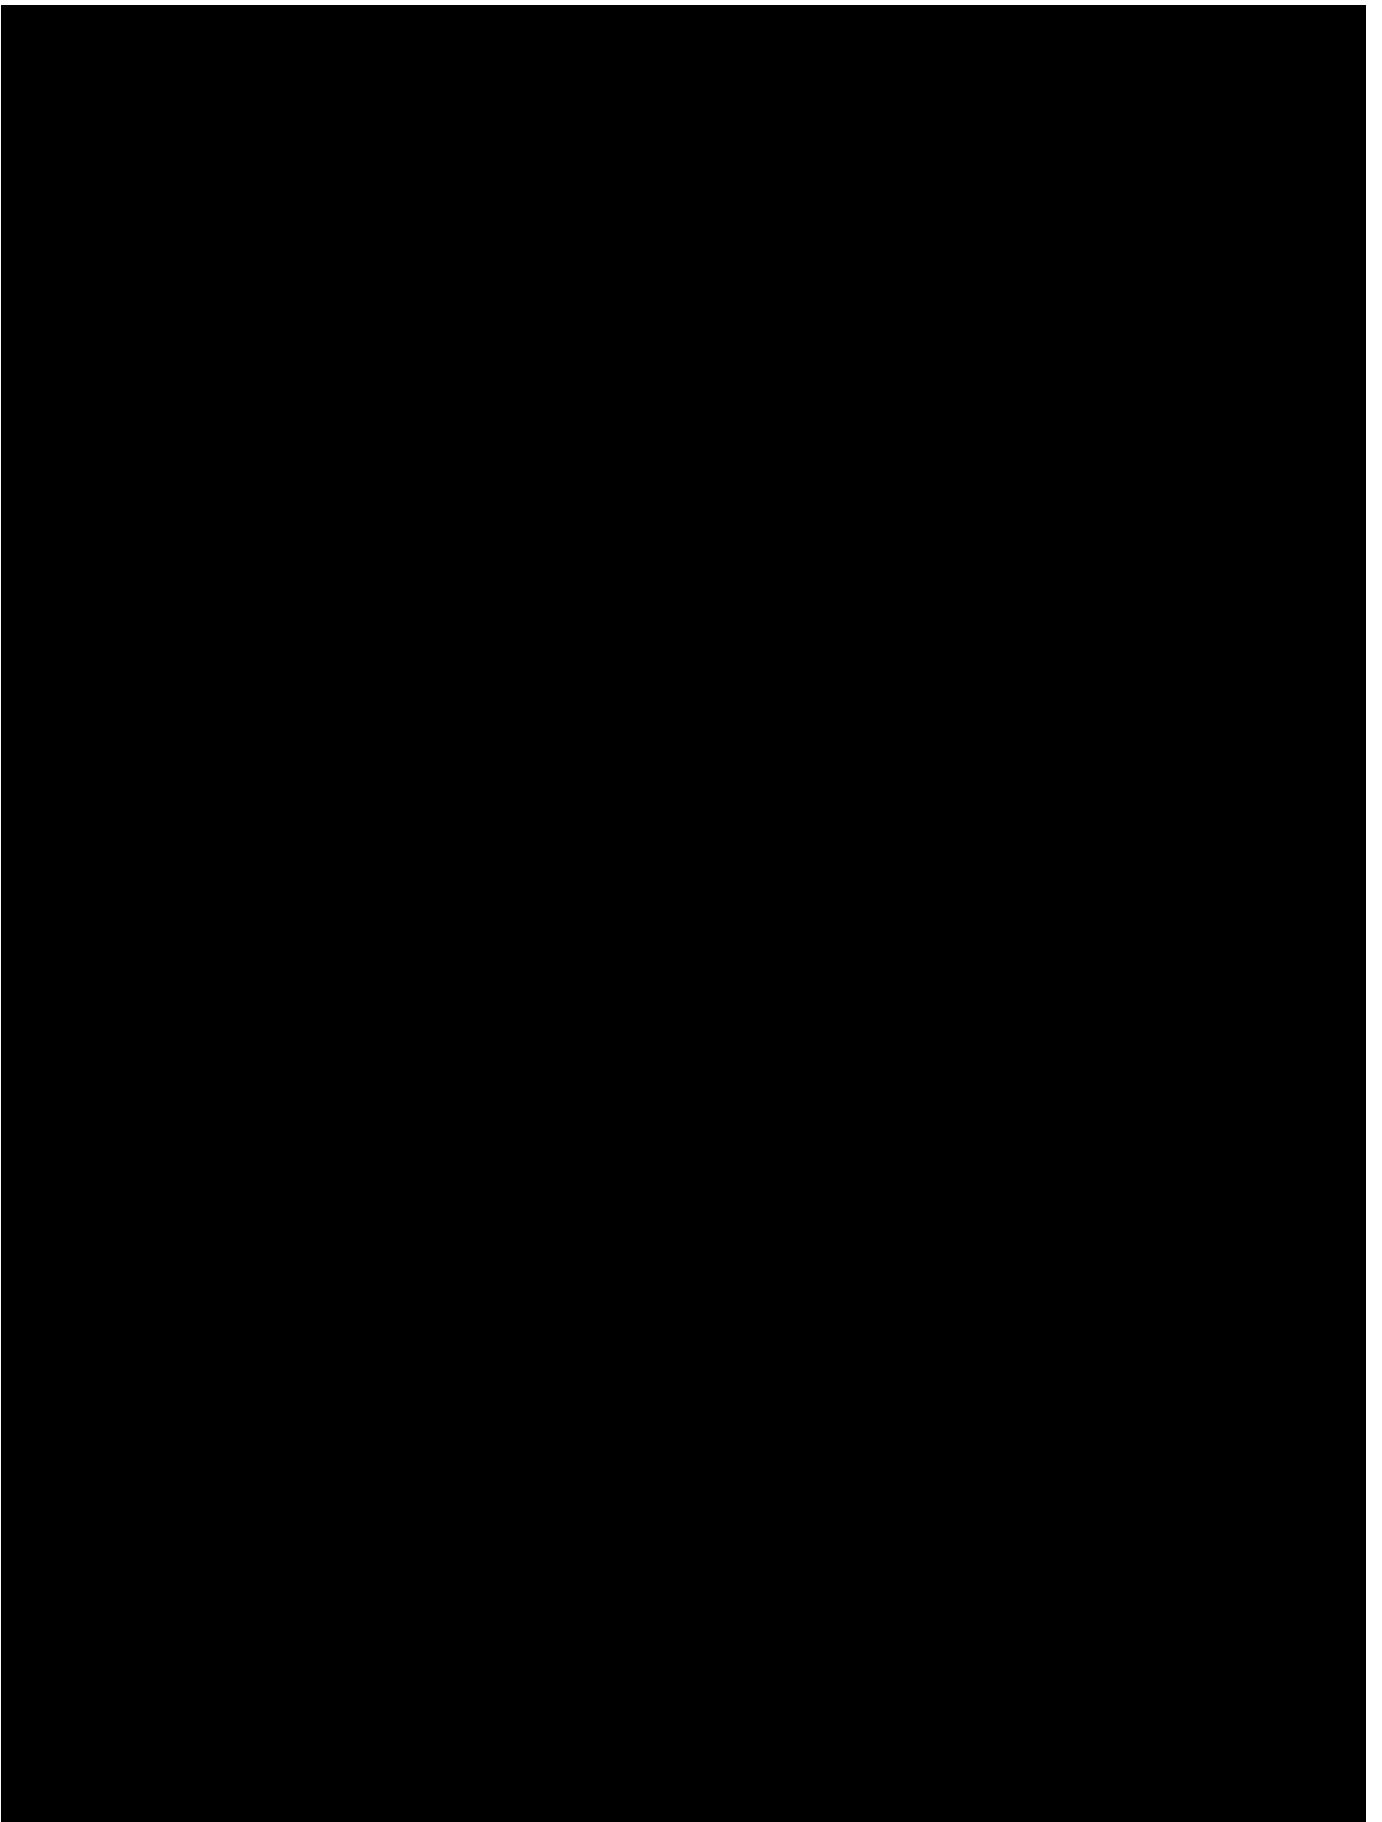

For advanced methods and OSINT automation:
<https://discord.gg/FG38hE9z1>

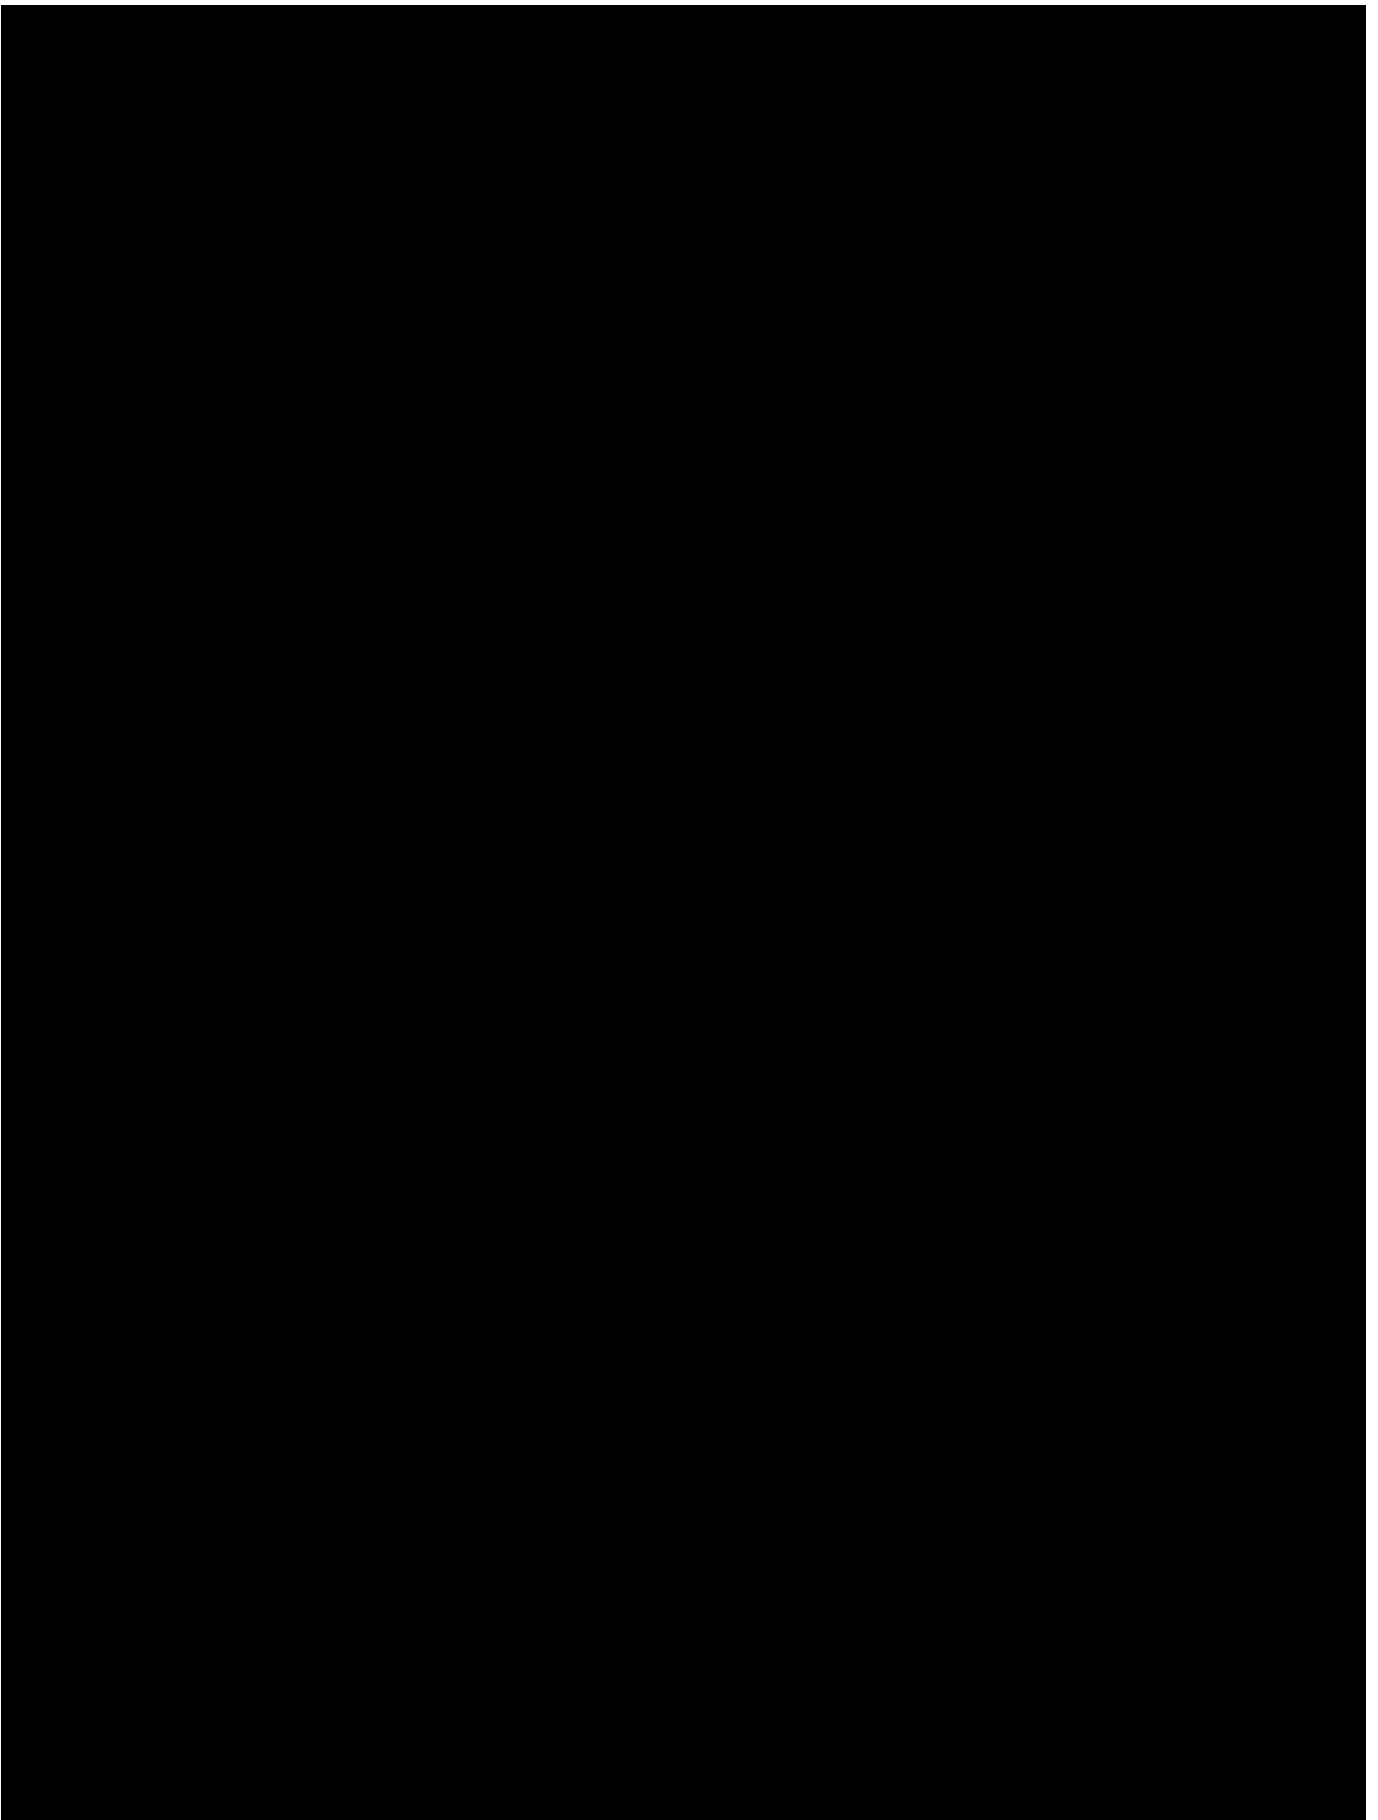

USAGE

- 1 Before using the tool, sign in to your Google account and then choose **File > Make Copy**. From that moment you will use your own copy of the tool.
- 2 When searching for a specific phrase, use a **DOT (.)** instead of a space - so you will not lose the hyperlink. Dots will not affect the results.

Last update: 24-02-2024

Recon & SOCMINT

Online tools for keyword-based reconnaissance and Social Media Intelligence

For advanced methods and OSINT automation:

<https://t.me/osintresult>

- NSFW - Use with caution!

- Free, login required

- Paid, login required

- Manual input on the site

CSE - Custom Search Engine

Use dot [.] instead of the space between words
