

Note that these are only **ESTIMATES**.

I do not include the repair costs from stealing vehicles, the money made from helping other CEO's, the money that can be made from VIP work, or the collection bonuses. Obviously though, those things would affect these numbers. I am assuming that an average sale takes 5 minutes.

The following 3 tables show the various profits that can be made depending on what type of car is in question and which seller the player chooses.
