Hello, thanks for taking a look at our Definition of Done (DOD) template!

HOW TO MAKE THIS YOURS

We wanted to share this with you so that you can make it your own and use it for your team. Feel free to add or edit things to make it fit for your team's product/project!

In order to edit this template, you'll need to make a copy. To do that you will need to:

1. Navigate to and click on the "File" tab.
2. Select "Make A Copy"
3. Name your file and select the location for your new file
4. Make any edits and share with your team!
5. Need additional help ? Contact anuraj.sl@bridge-global.com or ping me @ skype: anuraj.bridge

In Agile, a feature isn't considered done until it's ready for release.

The DoD could vary from team to team but it should be consistent within the team. Based on the type of projects, teams could have distinct sets of definition of done
- at the feature/requirement/user story level,
- at sprint level,
- at release level.

It is important to identify a DoD that works for your team and your business needs and ensure everyone in the team understands the DoD manifesto.

It can evolve over time to include a broader definition of done and in that case, inform the team members of the changes.

By applying this to all the projects/products you can ensure the team is delivering the right thing in the right way with atmost quality

Kindly get back to me if you have any more queries on this. I would be very happy to help with it.

Keep Rocking! :) Have a great Day!

✓	Date	Task
☐		Definition of ready is met
☐		Produced code for presumed functionalities without any build error
☐		Unit Testing is done and passed
☐		Code review is complete
☐		Acceptance Criterias are written and passed
☐		UI/UX is approved and completed
☐		Testers write Test Cases based on requirement/acceptance criteria/devices/browsers and hand over to development team
☐		Developer Execute one round of test case execution in dev env and mark the status to 'passed' before passing it for QA
☐		Testers execute test cases on all environments and all test cases are passed
☐		Localisation and Translation completed and tested
☐		Regression Testing is done
☐		Automation Tests are written by the testers and are passed.
☐		Documentation done/updated
