[1] Please add here, when you added (or edited) your row last time.

[2] The date you have purchased the index.

[3] All Dates are in 2019. All Times are UTC+2.

[4] Probably checked steam page instead of email

[5] In this table, each date represents the most recent moment that a product was initially reserved for that status.

EXAMPLE: A 'Shipped' date of May 01 for the 'HMD' product, means that the most recently shipped HDM product was initially reserved on May 01.

This does NOT mean that the product was shipped on May 01.

Since Valve processes orders in a "first come, first serve"-fashion, this can help you estimate how far out your order is, compared to your own reservation moment.
