

Welcome to the data sheet for Passwords.

Use the tabs below to navigate through different sheets of data.

This dataset is twinned with a visualisation from the book, Knowledge is Beautiful by David McCandless (out Sep 2014)

You can find out more here:

<http://www.informationisbeautiful.net/2014/knowledge-is-be>

And you can see more great info graphics & visualisations here:

<http://www.informationisbeautiful.net>

Explore more great data

<http://www.informationisbeautiful.net/data/>

Thanks

David

<b>How passwords are cracked these days</b>			<a href="http://boingboing.net/2">http://boingboing.net/2</a>
<b>Fast</b>			
<b>Efficient (i.e. clever)</b>			
Try the most common first			
Root then suffix, usually			
A good 25% of passwords can be found with these dictionaries	stats		
Then other dictionaries			
About 60% of passwords are nixed by this			
Personal details			
date of birth, post codes, names of family members etc			
scan your hard-drive for file names, scan all your emails			
<b>Two options</b>			
A random alphanumeric generated by a password generator			
Convert a memorable sentence into a memorable password			
<b>Tips</b>			
Never re-use a really good password			
Two factor authentication			
Avoid secret questions
