		just a bit of xextanic lore
		so this idea came to me in a dream for a quasi-language or symbology
		consisting solely of a small number of "signs"
		representing concepts familiar to almost all conscious beings
		each point on the Xextan heart symbol represents one of these nine signs
		the names of each sign consist solely of the syllables:
		e / pe / ti / ka / xi / la / no / jo / wa
		each of these 9 elements occurs exactly three times
