

INSTRUCTIONS

Choose the contest rank you will be entering. The criteria for individual point counts as well as the total point range for victory (the left value is the minimum for a possible victory, the right value is the minimum for assured victory) will be displayed.

Next, choose the specific criteria given for the contest if applicable (inapplicable attributes won't be factored in if you set a criterion that isn't used in that rank, but the sheet will display an error if a criterion that is judged is not set). This will allow your point totals to be calculated in the next step.

Lastly, choose from the lists of Outfits, Hats, and Glasses to see the rundown of the points you will get for wearing this set to this competition. If the total field is red, you won't win. If it's yellow, you have a chance of winning, If it's green, you are virtually guaranteed to win.

Good luck!
