

Pacific Crest Trail Water Report -- Oregon : Ashland, OR to Cascade Locks, OR

Ashland, OR to Cascade Locks, OR

Updated 11:27am 12/17/17

www.pctwater.com

See Snow/Fords page for updates on Snow & Creek crossings & Road Closures in Oregon.

Never rely on water caches!!! With the increase in the number of hikers, it's virtually impossible for anyone to maintain a cache that always has enough water (for more info visit <http://www.pcta.org/2015/problem-water-caches-pct-27677/>). Also, to reduce the impact at popular camping sites that offer natural water sources please consider dry camping (for more info visit <http://www.pcta.org/2015/dry-camping-away-from-water-30263/>).

Send email updates to water@pctwater.com or phone/text 619-734-7289 or 619-734-PTCW [voice mail/text only, no one will answer]. Water reports are compiled from email updates, posts to the PCT-L, on-line trail journals, and other on-the-ground reports. Mileages and waypoint names used in this water report are from Halfmile's PCT maps [www.pctmap.net]. Please send photos & videos of water sources, fires, passes, and stream creek crossings to our [Facebook page](#) called "PCT Water,Fire,Passes,Fords Update Group"

Beware of contaminated water. Things that could make you sick are too small to see. You don't know if a dead carcass was just removed from that tank/spring/creek or what's hidden upstream. Purify backcountry water. Close lids on springs and tanks to protect water quality.

Take fire safety seriously. Generally, there will be strong fire restrictions in place this summer. Campfires might be banned. Alcohol stoves and smoking may also be banned. Make do without and use extreme caution if allowed. Rules change as you cross agency boundaries. Don't be the one that destroys the trail. Alcohol stoves start fires – go stoveless or carry a stove with a contained fuel source and a shut-off valve.

Water sources with blue text [marked with * or **] have historically been more reliable. Sources marked with ** are more likely to have water year-round than those marked with a single *. Water described as seasonal, usually dry, early spring, etc. are less reliable.

Map	Mile	Waypoint	Location	Report	Date	Reported By
	1716.2	Ashland				
	1717.5		Seasonal stream under bridge.	Trail-north of the bridge there's a small path heading trail-west ~100ft to a still-flowing stream. Might be able to submerge/fill a Nalgene, or a scoop will make easy work of it.	8/24/17	Mercury
B2	1725.6	WA1726	Piped spring	flowing just under 2L per minute	8/13/17	Pano
B2	1727.6	WA1728	Piped spring near a small pond, 100 yards NW of PCT.	7/26/17 (Electro) : plenty of water. 7/21/17 (Santa & Tyee) : Have to open valve on up side of rusty holding tank to get water. Cistern up hill with metal lid has water if piped water does not work.	7/26/17	Electro
5/31/17 (Michael White) : I just hiked southbound from Mile 1733 (Hwy 66) to Mile 1653 (Seiad Valley) . It's May 30th and the snow line starts at 6,000 feet , which is most of this section. It's hard hiking, hard route finding and dangerous on the traverses. Crampons needed . Tree wells are a problem as are snow bridges. Snow is soft on exposed areas and hard in the trees. Stick to the crest or south sided forest service roads when the trail goes on the north side of the mountains. It's slow going and difficult. This is not a place to go if you're trying to avoid snow. Oh, and the bears are out.						
B3	1734.6	WA1735	Small pond	Plenty of water in pond, but much better to collect from the 4L pool at the base of the spring house above the pond. Flow from spring house is less than 1L/min but easy enough to collect 4L or less if you have a scoop!	8/13/17	Notsofast
B3	1738.7	WA1739	Hyatt Lake outlet, bridge, large creek.	Lots of water. Relatively cold but with a slight algal taste. Nice spot for lunch though.	8/13/17	Notsofast
B4	1740.3	WA1740	Water fountain and spigot.	8/13/17 (Notsofast) : Both spigot and fountain are on. A sign indicates the water is potable. Great tasting. Best water in the immediate vicinity. 8/11/17 (Optimistic Turtle) : faucet is on! 7/21/17 (Santa / Tyee) : Spigot working. 7/16/17 (Halfmile) : Spigot working. 6/27/17 (Rudolph) : Spigots are off. 6/20/17 (I-Beam) : Water faucet is OFF. (Hyatt Lk Campground nearby has coliform issues so there is no water in the area). There was a sign saying they are working on the water system and hoped to have it done by 6/26/17	8/13/17	Notsofast
6/3/16 (Catherine) : There is also water and camping 3/10 mile off the trail at the Hyatt Lake PCT Backpacker's Campground mile 1740, \$2/night for camping.						
B4	1740.4		Spigot	The water is turned off. Same info as 1740.3	6/20/17	I-Beam
	1742.5		Wildcat Campground	Wildcat Campground next to Horse Camp at Hyatt Lake has a handpump/well with sweet tasting potable water. The footvalve is broken. You need full, strong strokes to operate it and a second person to capture the water.	6/8/16	Tyler
6/3/16 (Catherine) : Wildcat CG is a developed BLM campground, just northeast of the Hyatt Lake horse camp, 1/4 mile off trail. Take the marked side trail to Horse Camp at Mile 1742 (no water at Horse Camp itself).						
B5	1747.9	WA1748	Klum Landing Park Campground, 3/10 mi W of PCT.	spigots on, hot showers, trash cans	7/7/17	Halfmile
B5	1748.6	WA1749	Canal and bridge, unpaved road nearby.	Concrete canal is nearly full with tons of fast flowing water. It is quite cold, clear, and great tasting. Better than WA1749B (just a few hundred yards away) in my opinion.	8/13/17	Notsofast
B5	1748.7	WA1749B	Grizzly Creek with wooden bridge.	Plenty of water, several gallons per second flow.	8/13/17	Notsofast
B6	1752.7	WA1753	Piped spring	Many liters per minute flow of cold, clear water coming out of the pipe to fill a large pool. Great tasting.	8/14/17	Notsofast
There are 2 junctions, sign to the spring at 2nd junction. If you accidentally take the 1st junction then turn left at the jeep road, walk ~0.15 miles to the trail on right						

B7	1760.8	WA1761	* South Brown Mountain Shelter, cabin, picnic table, water pump.	<p>9/13/17 (I-Beam): I wanted to pass on to you some information I received through an email exchange with the Forest Service concerning the missing handle on the water pump at Brown Mountain Shelter at mile 1760.8. It turns out that it was the Forest Service that removed the handle in early June because there were some issues with maintenance of the water system and they didn't want hikers using the water until the maintenance was completed. They originally thought they would have it fixed by "mid hiking season" but because of the multiple fires this season resources had to be directed to fighting fires and they have not been able to do the required maintenance and do not expect to have it done this year.</p> <p>8/2/17 (Numbers) : Pump still has no handle. The stream by the road at 1761.0 is currently a couple of usable puddles and has no visible flow. There appeared to be only one water source north of the road, at 1762.0, and it was a usable shallow puddle about 10 ft west of the trail with barely a trickle of flow. If you're using guthook, the 1762.0 source is right at the blue line on the topo map, about 75 ft south on the trail from a dry, rocky creek bed. Otherwise, there's no water until hwy 140 at mile 1770.9. The nearest water source to the south is the piped spring at 1752.7, and if the rangers cant get the pump at South Brown Mountain Shelter fixed, this section will likely soon become an 18.2 mile dry stretch.</p> <p>8/2/17 (Optimistic Turtle) : pump broken so no water. There is water by the road mi 1761 but, spring is running very slow, creates a small puddle. Need scoop. This water source is crucial because next miles to Fish Lake the trail is hot very rocky on lavas. Stock up some water!</p> <p>8/1/17 (Electro) : Water pump is busted and four people couldn't find any nearby stream.</p> <p>7/28/17 (Pika & Laundry Mat) : didn't go to the shelter. Continued on PCT to dirt road at mile 1761, small spring flow from ground south of dirt road, pools to submerge water bottles</p> <p>7/22/17 (Santa / Tyee) : pump still broken. RD1761 Stream still flowing. It's getting muddy on south side and damaging the plant life. The north has been brushed so you can access a nice pool of water from the culvert. Some 2 springs still flowing between RD1761 and 1762.1. One useable and one need more development.</p> <p>7/7/17 (Halfmile) : pump still broken (missing handle), no access to water. 0.2 miles north of Brown Mtn Shelter is a seasonal stream near road has clear water flowing about 1 L / min. Stream bank is muddy near road, but OK 25 feet upstream.</p> <p>6/27/17 (Rudolph) : Does not work. Talked to forest ranger who said they were aware and planned to fix it but no ETA. On trail at road junction (1761.0) just north of Shelter is a small creek. Muddy and messy to access but has moderate flow > 1 liter per minute. There is a culvert under the road for this creek so it seems this must have fairly consistent water. Between creek at road junction (1761.0) and seasonal spring listed in water report (at 1762.0) is another moderate flowing creek with large pools. I didn't get exact miles, but sat pretty close to halfway making it 1761.5.</p> <p>6/20/17 (I-Beam) : The handle on the pump is gone at Brown Mt. Shelter, no way to pump water, but there is water at the nearby creek</p>	9/13/17	I-Beam
	1762.0		Seasonal Stream	<p>8/1/17 (Electro) : Creek at trail is dry but if you go 100-150 feet uphill to the right the creek is flowing at about 1-2 liters per minute.</p> <p>7/8/17 (Smiles & FLOW) : Creek bed is dry but still strong flow 50ft up the hill (right hand side of NOBO trail); 5 liters per minute.</p> <p>7/8/17 (Halfmile) : low flow, small pools, difficult to collect, may be dry soon, better water back at RD1761</p>	8/1/17	Electro
B7	1763.1	WA1763	Dry creek with a wooden bridge	Dry	8/1/17	Electro
	1770.9	Fish Lake Resort				
C8	1771.0	WA1771	Cascade Canal, Seasonal creek, wooden bridge.	Very strong flow of cold water.	8/15/17	Notsofast
C8	1771.3	TR1771B	Summit trail #3732 junction, stream nearby.	Dry	8/1/17	Electro
C2	1782.4	WA1782	* Christi's Spring.	Cold, easy to collect, delicious. More than a gallon per minute flow.	8/15/17	Notsofast
C4	1793.5	TR1793	Ponds to the northwest of PCT near TR1793	Two ponds that are very close together. Both have substantial water. About 100' diameter. 2nd pond appears to be slightly better, more clear.	8/1/15	GoalTech
C5	1796.8	WACS1797	Seasonal Creek	Several gallons per minute. Good tasting.	8/16/17	Notsofast
C5	1797.2	WA1797	Small creek	Several gallons per minute.	8/16/17	Notsofast
C5	1798.2	WA1798	Small creek	Several gallons per minute.	8/16/17	Notsofast
C5	1798.5	WA1798B	Creek.	Both creeks flowing at several gallons per minute of cold water. Easy to collect and good tasting.	8/16/17	Notsofast

C5	1799.6	WA1800	Honeymoon Creek, often muddy, water is often better at mile 1798.2	Large pool of clear, cool water covering the trail, fed by a small inlet stream. Hard to judge the flow but the water certainly wasn't stagnant. Looked fine to collect.	8/16/17	Notsofast
C5	1801.8	TR1802B	Trail to Ranger Spring (0.8 miles west of PCT)	Ranger Spring is a raging torrent, coming from the ground ex nihilo; there's also water running across the trail to the spring about half a mile from its junction with the pct. May as well also mention sevenmile creek, if only in the negative; it appears from the map it could be a more convenient water source than ranger spring, but most of its length, including its uppermost crossing of the sevenmile trail (TR1802) is dry. There are some pools of water a few tenths of a mile down the dry creekbed from that uppermost crossing.	7/7/16	Scott
C8	1806.4	WA1806	Seasonal Jack Spring, 7/10 mile W of PCT, may be dry, difficult to find.	7/30/17 (Pika & Laundry Mat) : went to pond 0.1 further up PCT to pond. Plenty of water although warm and slightly tea colored. A log down in the water makes it easier to collect water from center (don't have to grab water at the algae covered shores). 7/9/17 (Smiles & FLOW) : Pond 0.1 north of the Jack Spring junction still has water. 7/15/16 (Scott) : Deep hole full of clear water under a log at Jack Spring (WA1806); no flow from what appears to be the source uphill. The trail has disappeared along much of its length; not as hard to follow as it might seem, as there are bootprints and arrows in the dust to follow between stretches of faint trail trace, and the halfmile app still remembers where the trail should be, and it is laid out where one would naturally walk; but hikers uncomfortable with bushwhacking will not be happy. OTOH there's plenty of water in the pond 200' trail-west of the trail, 0.1 miles north of the Jack Spring trail (three ponds are shown on halfmile, but I only visited the closest). Just before reaching a carved "I" blaze on a tree (for nobos), look northwest to a gap between two rock outcroppings and march straight up between them. Much easier to reach than Jack Spring, and probably holds water longer.	7/30/17	Pika & Laundry Mat
7/15/16 (Scott) : Stuart Falls is one of the best features in the trail corridor between Fish Lake and Crater Lake. Too far to be a convenient out-and-back from the trail, but one could do a 7.5 mile alternate, bypassing 5.5 miles of trail, going down from TR1808 and back up to TR1814 (for nobos, reverse for sobos). This incidentally solves the potential water gap between Honeymoon Creek (WA1800) and Mazama Village (twenty miles further on); there's water 2.5 miles down TR1808 (so eleven miles from Honeymoon Creek) and water 3.8 miles down TR1814 (so eleven miles from Mazama Village).						
C8	1814.3		Seasonal Creek	dry	7/27/17	Dora the Explorer
C8	1819.2	Mazama	Mazama Store, restaurant, 1 mile SE of PCT	7/30/17 (Pika & Laundry Mat) : laundry available. 7/12/17 (Halfmile) : Mazama Village showers reopened today 7/12/17 (they had been closed due to water restrictions). Laundry is still closed due to water restrictions.	7/30/17	Pika & Laundry Mat
C9	1820.2	WA1820	Small seasonal creek	good flow	7/25/17	Josh & Sara
C9	1820.5	WA1820B	Creek	good flow	7/22/16	Coyote, Wylie, Tubbs
C9		CLWA01	Small creek - Rim Alternate mile .1	I wasn't keeping track of each of these, but there are tons of good streams crossing the rim alternate between Mazama Village and Rim Village	8/18/17	Notsofast
C9		CLWA01B	Small creek - Rim Alternate mile .7	I wasn't keeping track of each of these, but there are tons of good streams crossing the rim alternate between Mazama Village and Rim Village	8/18/17	Notsofast
C9		CLWA01C	Small creek - Rim Alternate mile 1.3	I wasn't keeping track of each of these, but there are tons of good streams crossing the rim alternate between Mazama Village and Rim Village	8/18/17	Notsofast
C9		CLWA02B	Visitor center with outdoor water fountain - Rim Alternate mile 2.3	The most convenient place to get water at Rim Village are the cafe soda machines. Staff were friendly. Head upstairs for more space to relax/repack if crowded downstairs. That said, the bathrooms work well too!	8/18/17	Notsofast
C9		RimVillage	Paved sidewalk to visitor center, small store, restrooms, and water - Rim Alternate mile 2.4			
C9A			Lightning Spring, 3/4 mile W of Rim Trail - Rim Alternate mile ~5	Tons of water at Lightning Springs between the crater lake rim trail and equestrian pct, easily 8s/liter, limited only by the size of the opening on your bottle.	7/6/16	Scott
C9A			Spring - Rim Alternate mile 7.4	Dry	8/29/17	Mule
C9	1820.6	WA1821	Small creek	Good flow	7/27/17	Robodoc
C9	1821.0	WA1821B	Small creek	Good flow	7/27/17	Robodoc
C9	1821.7	WA1822	Small creek	Good flow	7/27/17	Robodoc
C9	1823.9	WA1824	Stream	Good flow	7/27/17	Robodoc
C9	1824.2	WA1824B	Stream	Good flow	7/27/17	Robodoc
HIGH CASCADES COMPLEX (Crater Lake NP) https://www.nps.gov/crla/planyourvisit/conditions.htm https://www.pcta.org/discover-the-trail/trail-condition/spruce-lake-fire-crater-lake-national-park/ https://inciweb.nwccg.gov/incident/5503/ https://www.facebook.com/SCOFMPFIREINFO/ 10/12/17 (PCTA) : The official PCT is closed from the intersection with the Lightning Springs Trail (mile 1825) to the North Entrance Road (~mile 1836.7) . The Lightning Springs Trail and the West Rim Trail are open. Hikers will want to use the West Rim Trail through the park. Equestrians are not allowed on the West Rim Trail and will need to shuttle around the closed section of the PCT. The PCT closure will remain in place at least through early summer 2018.						
C10	1824.9	WA1825	Stream	Good flow	7/27/17	Robodoc
C10	1827.0	WA1827	Small creek, pool below culvert	Good flow	7/27/17	Robodoc
C11	1832.8	WACS1833	Red Cone trail camp, spring nearby.	Good flow, nice and cold	7/27/17	Robodoc

HIGH CASCADES COMPLEX (Crater Lake NP) --> see note above						
D2	1853.6	WA1854	<i>*Usually reliable Thielsen Creek</i>	Clear, clean & flowing well	8/31/17	Doug Fir
D5	1869.6	WA1870	Six Horse Spring, 4/10 mile E of PCT.	Go past the first pool (still flowing, but pretty slow). You can dip from the lower pool. Leave your pack at the top.	9/1/17	Doug Fir
OST1	4.4	WindyLakeTR	Windy Lake Trail Junction	Oldenburg Lake is full	7/8/17	Dogbite & Madi
OST1	5.2	OSPond	Pond along OST	Lake has plenty of water.	8/21/17	Notsofast
OST2	9.2	CrescentLkCG	<i>**Crescent Lake Campground</i>	8/4/17 (Electro) : Crescent Lake Campground has working faucets with clear, cold water. 7/8/17 (Dogbite & Madi) : We crossed a large stream just at the trail junction that was flowing with tons of water. Tried to go to the lake at a "group camp" to the left and got bit by a dog.	8/4/17	Electro
OST2	10.2		Whitefish Creek	Many gallons per minute flow. Water was very cold and tasted great!	8/21/17	Notsofast
OST2	12.6		Small Creek	Flowing 2-3 liters per minute	9/7/17	Trekever
OST3	15.3	CSDiamondView	<i>Campsite at Diamond View Lake.</i>	Plenty of water in the lake and it tasted fine. The water is quite shallow on most of the shore and a scoop will help a lot when collecting.	8/21/17	Notsofast
D6	1878.1	WA1878	Small pond just off trail, through the trees.	Pond still big enough for dipping and reasonably clear.	9/1/17	Doug Fir
D7	1886.8	WACS1887	Summit Lake.	A big lake. Cool, clear water with easy access.	9/2/17	Doug Fir
D8	1888.9	WA1889	Large pond	this pond has the best water of all the ponds in the section 1 mile north of Summit Lake CG	8/4/17	Dan
D8	1890.0	WACS1890	Large pond	Full but stagnant	7/23/15	Kinetic
D9	1894.1	WA1894	Creek	Good flow. Cold and clear.	9/2/17	Doug Fir
D9	1896.8	WA1897	Small seasonal creek	Mostly not flowing right now, but it still has a few Nalgene-depth, pine needle-dusted pools from which water can be gotten.	9/2/17	Doug Fir
D9	1896.9	WA1897B	Small pond	Plenty of good, clear water.	8/30/17	Mercury
D9	1899.3	WA1899	Pass above a large pond.			
D9	1899.9	WA1900	Hidden Lake	full of water	8/7/16	Young Blood
D10	1900.1	WA1900B	Large pond			
D10	1900.9	WA1901	Arrowhead Lake	lake is full of warm water	8/7/16	Young Blood
D10	1904.1	ShelterCove	Shelter Cove Resort	Odell Lake has big blue-green algae outbreak. Do not swim or bathe in it.	7/29/16	Julie
E1	1908.4	WACS1908	<i>**Lower Rosary Lake</i>	Lake is full	7/23/17	Halfmile
E1	1908.5	WACS1909	<i>**Lower Rosary Lake</i>	Lake is full	7/23/17	Halfmile
E1	1909.0	WACS1909B	<i>**Middle and Upper Rosary Lake.</i>	Both lakes have plenty of clear, cool water.	9/3/17	Doug Fir
E2	1915.1	WACS1915	<i>**Bobby Lake</i>	Clear water. Plenty of it.	9/3/17	Doug Fir
	1915.27		Pond [50 yards off trail]	Has water	9/10/17	Trekever
	1915.45		Pond [20 yards off trail]	Has water	9/10/17	Trekever
E3	1922.6	WACS1923	<i>**Charlton Lake</i>	Large lake with clear water but there is heavy traffic here so it might be worth treating anyway.	8/6/17	Electro
E3	1922.8	WACS1923B	<i>**Charlton Lake</i>	Lake is full with cool water tastes fine.	8/23/17	Notsofast
E4	1927.8	WACS1928	Taylor Lake	Lake is nearly full.	8/23/17	Notsofast
E4	1928.6	WA1929	<i>**Irish Lake</i>	Lake has plenty of clear, cool water that tastes fine.	8/23/17	Notsofast
E5	1930.8	WACS1931	<i>**Brahma Lake</i>	Lake is full with clear water.	8/23/17	Notsofast
E5	1931.8	WACS1932	Small lake.	Medium-sized lake with lots of plant growth on top.	8/6/17	Electro
E5	1932.8	WACS1933	<i>*Stormy Lake</i>	Lake is full with clear, cool water that tastes fine. Easiest place to collect is the off the large log directly beneath the campsite.	8/23/17	Notsofast
E5	1935.8	WA1936	Small Lake	Plenty of water in lake.	8/24/17	Notsofast
E6	1938.9	WA1939	Small lake	Lake is full.	8/24/17	Notsofast
E6	1939.1	WACS1939	<i>**Desane Lake</i>	Lake is nearly full with clear water.	8/24/17	Notsofast
E6	1939.5	WACS1939B	S Lake	Lake is full with clear water.	8/24/17	Notsofast
E6	1939.8	WACS1940	<i>**Mac Lake</i>	Lake is full with clear water.	8/24/17	Notsofast
E6	1940.7	WACS1941	<i>**Horseshoe Lake</i>	Lake is full with clear water that tastes okay.	8/24/17	Notsofast
E6	1940.9	WACS1941B	<i>**Horseshoe Lake</i>	Lake is full with clear water that tastes okay.	8/24/17	Notsofast
E6	1941.7		Cliff Lake, 2/10 mile E of PCT	Lake is full	7/23/17	Halfmile
E6	1944.0	WA1944	<i>**Island Lake</i>	Lake is full with clear water.	8/24/17	Notsofast
E7	1944.7	WACS1945	<i>**Dumbbell Lake</i>	Lake is full with clear water.	8/24/17	Notsofast
E7	1947.7	WACS1948	Creek	Strong flow of many gallons per minute of cold, clear, delicious water.	8/24/17	Notsofast
THREE SISTERS & MILLI FIRE						
https://inciweb.nwcg.gov/incident/5517/						
https://www.facebook.com/WilliametteWildfires2017/						
10/10/17 (PCTA) : The Pacific Crest Trail is closed from Elk Lake (mile 1950) to Highway 242 (mile 1981.5). Much of the rest of Three Sisters Wilderness is also closed and will remain closed for the foreseeable future.						
	1950.1	Elk Lake Resort				
E8	1956.3	WACS1956	<i>**Sisters Mirror Lake</i>	Small lake with moderately clear water but teeming with mosquitoes	8/8/17	Electro
E9	1959.6	WACS1960	North Fork Mesa Creek	good flow, multiple liters per minute	8/11/17	Give A Hoot
	1960.11		Creek	Flowing cold and clear at 2+ gallons per minute	8/8/17	Electro
E9	1960.5	WA1960	Stream	excellent flow, gallons per minute	8/11/17	Give A Hoot

E9	1960.7	WA1961	Stream	good flow, multiple liters per minute	8/11/17	Give A Hoot
E9	1963.2	WA1963	Hinton Creek	good flow but cloudy	8/11/17	Give A Hoot
E10	1969.5	WA1970	Obsidian Creek	excellent flow, multiple gallons per minute	8/11/17	Give A Hoot
E10	1969.6	WA1970B	Sister spring, water flowing from the base of a mountain.	Cold and clear at many gallons per minute.	8/8/17	Electro
E10	1970.5	WA1971	Glacier Creek	excellent flow, multiple gallons per minute	8/11/17	Give A Hoot
E11	1973.7	WA1974	Spring	gentle flow, the soft murmuring of the stream caresses your ears as you gaze towards the smoke clouds to the north, the dark and imposing thunderheads to the south, and bright patches of snow nearby..... um, several liters per minute	8/11/17	Give A Hoot
E12	1977.2	WA1977	South Matthieu Lake	good water	7/27/17	Halfmile
E12	1979.3	WA1979	Large pond	Small pond with fairly clear water; fine after filtering and treating.	8/8/17	Electro
E12	1980.1	LavaCampLk	Lava Camp Lake, campground, outhouse, 1/2 mile northeast of PCT mile 1988.3.	Lake is mostly full. ----- DoubleTap : I recommend hiking to Hwy 242 via the Lava Lake Camp Trail and hitching from there as there is a big spot for cars to pull over at unlike right at McKenzie Pass. Plus, a lot of day hikers park their cars at Lava Camp Lake and they can be potential rides to Sisters or Bend.	8/10/15	Cloud Rider
	1981.3	Sisters				
	1981.3	Bend				
THREE SISTERS & MILLI FIRE (see note above)						
F1	1983.7		Spring			
F2	1989.0		Washington Ponds	I don't think I could disagree with the facts about these ponds but they are stagnant, unpleasant and infected with mosquitos. the hill to get up there is steep and treacherous. Avoid at the end of a long day.	8/12/16	Red Riding Hood & Shaggy
F2	1992.6	YouthCampHQ	Big Lake Youth Camp, 8/10 mile N of PCT.	Potable water can be collected from the faucet outside the PCT hiker building. Also note that the office hours of BLYC will be significantly curtailed after their camp season ends on September 7th. Be aware of this if you need to pick up a box that you sent there. ----- Bill (PCT Steward) : Take the trail on the left off the PCT at the T Junction, however once on that trail do not take the next trail coming in from the left, but remain going straight and that will take you to the camp.	8/27/15	Notsofast
F3	1996.5	WA1996	<i>*Large Pond.</i>	good water	7/27/17	Halfmile
F4	1998.4	Hwy20	Hwy 20, Santiam Pass			
F5	2008.1	WA2008	Pond near Koko Lake.	water in this pond ok after filtering, may go stagnant in 6-8 weeks	7/28/17	Halfmile
F6	2012.3	WACS2012	<i>**Rockpile Lake</i>	good water in lake	7/28/17	Halfmile
F7	2020.2	WA2020	<i>**Shale Lake</i>	clear water, shallow	8/14/16	Oolong
F7	2023.2	WA2023	Stream at the end of a switch back.	dirt is moist/wet but I didn't see any way to extract water	9/1/16	Rover
WHITEWATER FIRE https://www.pcta.org/discover-the-trail/trail-condition/whitewater-fire-mt-jefferson/ https://inciweb.nwcg.gov/incident/5420/ https://www.fs.usda.gov/detail/willamette/fire/?cid=FSEPRD552029 https://www.pcta.org/wp-content/uploads/2017/09/whitewater-fire-fseprd553851.jpg?x24952 (Area Closure Map) 10/12/17 (PCTA) : The Pacific Crest Trail is closed from the Hunts Creek Trail # 3440 (mile 2025) just north of Pamela Lake north to the Whitewater Trail #3429 (mile 2030).						
F7	2025.1	WA2025	<i>*Milk Creek</i>	excellent flow, lots of water. Not as silty as I expected. Water was pretty clear.	8/14/16	Oolong
F8	2027.1	WACS2027	Small pond.	stagnant, a bit green	8/14/16	Oolong
F8	2027.8	WACS2028	Seasonal Jeff Creek	Good flow	8/14/16	Oolong
F8	2029.4	WA2029	<i>*Russell Creek, can be a dangerous crossing.</i>	raging but not as deep as it looks. Very silty. Just after crossing (NoBo) there is a very small trickle of clear water coming down out of the bushes.	8/14/16	Oolong
F8	2029.7	WACS2030	Creek	good flow, easy to collect	8/14/16	Oolong
F8	2029.9	WA2030	Creek	good flow	8/14/16	Oolong
WHITEWATER FIRE (see note above) https://www.pcta.org/discover-the-trail/trail-condition/whitewater-fire-mt-jefferson/						
F8	2030.4	WA2030B	Large creek with a wooden bridge.	good flow	8/14/16	Oolong
F8	2031.7	WA2032	Creek	flowing, shallow	8/14/16	Oolong
	2031.8		Seasonal Creek	flowing, shallow	8/14/16	Oolong
F8	2032.2	WA2032B	Creek	flowing, shallow	8/14/16	Oolong
F9	2036.8	WA2037	Creek flowing under an unpaved road.	some big stagnant pools	8/14/16	Oolong
F9	2036.9	BreitenbushCG	Breitenbush Lake Camp Ground, 3/10 mile NE of PCT, shelters .	The water looks stagnant but if you keep going into the campground, past a site, by the second bridge is a DREAMY piped Spring! It is max a one minute walk.	8/17/16	Red Riding Hood & Shaggy
F9	2037.5	WA2037B	Large pond	pond is full	8/15/16	Oolong
F9	2037.7	WA2038	Large pond	pond is full	8/15/16	Oolong
F10	2040.7	WACS2041	Upper Lake	lake is full	8/15/16	Oolong
F10	2041.1	WACS2041B	Cigar Lake	lake is full	8/15/16	Oolong
F10	2042.5	WA2042	Small lake	lake is full	8/15/16	Oolong

F10	2043.1	OlallieStore	Olallie Lake Store, small store 1/10 mile E of PCT. www.olallielakeresort.com	faucet behind store is on ----- 8/12/16 (Bandita) : they keep this store well-stocked with hiker food, fuel, cold drinks and other supplies -- full resupply possible and staff super friendly	8/15/16	Oolong
F10	2043.1	WACS2043	Head Lake	full and clear	8/22/16	Data
F11	2046.8	WACS2047	Jude Lake	lots of water, but stagnant	8/22/16	Data
F11	2047.5	WA2047	Seasonal stream	Good flow	8/27/17	Pano
F11	2052.1	WACS2052	Lemiti Creek, established campsite nearby.	water flowing, but shallow pools may need a scoop, greenish color, some bugs, but all good	8/14/17	Optimistic Turtle
F11	2052.5	WA2052	<i>*Trooper Spring</i>	good, cold water wells up to fill a nice pool	8/27/17	Pano
F13	2060.0	WACS2060	Small spring, 250 feet W of PCT	Low flow but good clear cold water.	7/1/17	Halfmile
F13	2062.1	WACS2062	Warm Springs River	great flow, multiple gallons per minute	8/14/17	Give A Hoot
F13	2062.4	WA2062	Small spring, 300 feet E of PCT.	Nearly stagnant and did not look very appealing.	8/21/15	The Optimist
F15	2070.7	TR2071		Joe Graham horse camp about 1/3 mile off trail has working water spigots.	7/2/17	Halfmile
F15	2071.6	WA2072	Trailside water from Oak Grove Fork Clackamas River.	excellent flow, multiple liters per minute	8/14/17	Give A Hoot
F15	2071.9	WA2072B	Trailside spring	good flow	8/14/17	Give A Hoot
F15	~2073.5		Timothy Lake	lake full. Numerous paths lead down to the lake between here and 2075.3	8/16/16	Oolong
F15	2075.3	WACS2075	Timothy Lake	plenty of water	8/14/17	Give A Hoot
F15	2075.5	WA2076	Trailside spring	good flow of clear water, multiple liters per minute	8/14/17	Give A Hoot
F15	2075.7	WA2076B	Trailside spring	good flow of clear water, multiple liters per minute	8/14/17	Give A Hoot
F15	2076.0	WA2076C	Large creek and a wooden bridge.	excellent flow, gallons per minute	8/14/17	Give A Hoot
F15	2076.3	TR2076C	Little Crater Lake and campground trail junction. Little Crater Lake is 1/4 mile E of PCT.	Super easy, short side trail to the pond. Water is crystal clear, ice cold, delicious and beautiful! Definitely worth seeing.	8/22/15	The Optimist
F15	2076.3	LCraterLk	Little Crater Lake, water, 1/4 mile E of PCT	Falsely advertised as Little Crater Lake. Does not appear to be any of the above. More appropriate would be 'Tiny Blue Hole'. Otherwise, water is clear and cold, if you're into that kind of thing. ----- 8/16/16 (Oolong) : plenty of water. Most of the tourists put their feet in and a couple people swam - you might want to filter/treat this despite how clean it looks.	8/17/16	Red Riding Hood & Shaggy
F16	2080.2	WACS2080	Small spring	Good flow	8/27/17	Pano
	2084.1	FrogLkCG	Frog Lake Campground, well water, 6/10 mile SE of PCT.	Frog Lake well pump handle removed. No water available but the lake from what I saw.	9/15/15	Warner Springs Monty
G1	2092.0	WACS2092	Stream	good clear water, multiple liters per minute	8/14/17	Give A Hoot
G1	2094.2	WA2094	Large creek	good flow, multiple liters per minute	8/14/17	Give A Hoot
G1	2094.5	TimberlineLdg	Timberline Lodge, 2/10 mile S of PCT.	Awesome buffet		
G1	2095.5	WA2096	Creek	no flow at trail crossing	8/3/17	Halfmile
G2	2097.3	WA2097	Spring flowing across the trail.	nice clear water, 2 liters per minute	8/18/17	Give A Hoot
G2	2097.8	WA2098	<i>*Zigzag River</i>	running like a river, slightly silty	8/18/17	Give A Hoot
G2	2099.5	WA2100	<i>*Lost Creek</i>	nice clear water, multiple liters per minute	8/18/17	Give A Hoot
G2	2100.1	WA2100B	Headwaters of Rushing Water Creek. May be underground near the PCT.	nice clear water, multiple liters per minute	8/18/17	Give A Hoot
G2	2100.5	WA2100C	Small stream	nice clear water, multiple liters per minute	8/18/17	Give A Hoot
G2	2103.8	WACS2104	Creek	running like a river, slightly silty	8/18/17	Give A Hoot
G2	2103.9	WA2104	<i>**Sandy River, often silty, can be a dangerous crossing.</i>	raging torrent of silty water	8/18/17	Give A Hoot
G2	2104.2	WACS2104B	Trailside stream	good clear flow, multiple liters per minute	8/18/17	Give A Hoot
G2	2104.3	RamonaFalls	Ramona Falls	gorgeous flow	8/25/16	Data
G3	2106.0	WA2106	Large creek with a log footbridge.	log bridge still there and good flow	8/25/16	Data
G3	2106.4	WACS2106	<i>*Muddy Fork, hiker bridge washed out in 2014 but fallen logs allowed crossing, in 2015 Double log crossing with rope in place to cross</i>	Good flow. Dry crossed via logs.	8/17/17	Optimistic Turtle
G3	2107.5	WA2108	Seasonal stream	good flow, multiple liters per minute	8/18/17	Give A Hoot

COLUMBIA RIVER GORGE FIRE & INDIAN / EAGLE CREEK FIRE UPDATE<https://www.pcta.org/discover-the-trail/trail-condition/indian-creek-fire-columbia-river-gorge/><https://inciweb.nwcg.gov/incident/5403/> (Indian Creek Fire)<https://inciweb.nwcg.gov/incident/5584/> (Eagle Creek Fire)<https://www.facebook.com/EagleCreekandIndianCreekFires2017/><https://www.facebook.com/mthoodnf><https://www.pcta.org/wp-content/uploads/2017/09/00001.jpg?x99107> (Closure Notice)<https://www.pcta.org/wp-content/uploads/2017/09/00001.jpg?x45970>https://www.pcta.org/wp-content/uploads/2017/09/9-9-17-HRRD-Closure-Order-Map__Page_2.jpg?x45970 (Closure Order Map)**9/11/17 (PCTA) : The Pacific Crest Trail is closed from Lolo Pass (~mile 2112) to Cascade Locks (~ mile 2144.5) due to the Eagle Creek and Indian Creek fires. We recommend that northbound PCT hikers leave the PCT at Timberline Lodge rather than Lolo Pass.****Resources**Mountain Express Bus Schedule: <http://www.mthoodepress.com/schedule-map>Mt. Hood National Forest Alerts: <https://www.fs.usda.gov/alerts/mthood/alerts-notices>CRGNSA Alerts: <https://www.fs.usda.gov/alerts/crgnsa/alerts-notices>**Options for getting around this closure**

1) Shuttle from Bend to Stevenson, WA: this option bypasses all the trail closures related to fires on the Mt. Hood and Willamette National Forests and the Columbia River Gorge National Scenic Area.

2) Shuttle from Timberline Lodge to Stevenson, WA: This option is for hikers who are coming from Olallie Lakes area, north to the Mt. Hood Wilderness. Hikers can hike a hundred yards south from the PCT to Timberline Lodge. From this point, the Mt. Express bus has service to Sandy, Oregon, which has connecting public transportation on the SAM bus into Gresham, Oregon. One-way fare is \$2 on the Mountain Express.

3) Lolo Pass Road to Highway 26 (not recommend at this time): Hikers can cover the Mt. Hood Wilderness section of the PCT from Timberline Lodge to Lolo Pass Road. Hikers will then need to hike out from the junction with Lolo Pass road, to Highway 26 – about 10.6 miles. From this point hikers will be near the village of Zigzag, Oregon. In Zigzag there are public transportation points for the Mountain Express bus to take hikers to the town of Sandy, Oregon, and on to Gresham, Oregon.

NOTE: The maps direct you to travel I-84 and the Bridge of the Gods. Both the road and bridge are currently closed due to the fire. Check road conditions before you head to Cascade Locks.

G3	2112.1	WACS2112	Stream	good flow, 2+ liters per minute	8/18/17	Give A Hoot
G4	2116.1	WACS2116	Salvation Spring	reasonable flow, 2 liters per minute	8/18/17	Give A Hoot
G5	2119.6	WA2120	Small seasonal spring next to PCT.	Dry	8/18/17	Give A Hoot
G5	2125.1	WA2125	<i>Indian Spring, piped spring</i>	Flowing but slow, a scoop can be helpful. When you arrive the only picnic table, there is a "spring" with arrow written on table. Follow the trail down it is right before the closure.	8/17/17	Optimistic Turtle

Spring is down the hill 50 ft on the Indian Springs Trail.

7/9/16 (The Optimist) : There have been some rumors that part of the Eagle Creek trail is closed due to a damaged bridge just north of Punch Bowl falls. This is incorrect; the trail is open. The bridge is out and there is a very easy creek crossing (step across, no ford) a few steps to the east of the damaged bridge.

	2125.1	ECRest	Bathroom, water fountain, near parking area.	Fountain is on at the bathroom but is disgusting. Wait for the bathroom further down the road (NOBO).	8/16/15	Cloud Rider
G5	2125.1	WACS2125	Indian Springs Campground, abandoned, spring nearby.	Good reliable water source.	9/9/15	Warner Springs Monty
G6	2128.1	WACS2128	Watum Lake	Large lake is full of clear water.	7/9/16	The Optimist
G7	2136.5	WA2137	Teakettle Spring, next to PCT.	flowing just over 1L per minute	9/1/17	Pano
G8	2140.4	WA2140	Small stream	excellent flow, multiple liters per minute	9/2/17	Buddha
G7	2142.3	WA2142	Creek, wooden bridge.	multiple gallons per minute	8/18/17	Give A Hoot
	2144.2	Cascade Locks
