Send email updates to water@pctwater.com or phone/text **619-734-7289** or **619-734-PCTW** [voice mail/text only, no one will answer]. Water reports are compiled from email updates, posts to the PCT-L, on-line trail journals, and other on-the-ground reports. Mileages and waypoint names used in this water report are from Halfmile's PCT maps [www.pctmap.net]. Please send photos & videos of water sources, fires, passes, and stream creek crossings to our [Facebook page](#) called "**PCT Water, Fire, Passes, Fords Update Group**"

Never rely on water caches!!! With the increase in the number of hikers, it's virtually impossible for anyone to maintain a cache that always has enough water (for more info visit <http://www.pcta.org/2015/problem-water-caches-pct-27677/>). Also, to reduce the impact at popular camping sites that offer natural water sources please consider dry camping (for more info visit <http://www.pcta.org/2015/dry-camping-away-from-water-30263/>).

Beware of contaminated water. Things that could make you sick are too small to see. You don't know if a dead carcass was just removed from that tank/spring/creek or what's hidden upstream. Purify backcountry water. Close lids on springs and tanks to protect water quality.

Take fire safety seriously. Generally, there will be strong fire restrictions in place this summer. Campfires might be banned. Alcohol stoves and smoking may also be banned. Make do without and use extreme caution if allowed. Rules change as you cross agency boundaries. Don't be the one that destroys the trail. Alcohol stoves start fires – go stoveless or carry a stove with a contained fuel source and a shut-off valve.

Water sources with blue text [marked with * or **] have historically been more reliable. Sources marked with ** are more likely to have water year-round than those marked with a single *. Water described as seasonal, usually dry, early spring, etc. are less reliable.
