

**DIF Customized Employment(CE)**

CE is a person-centered approach that leads to a competitive integrated employment outcome. CE is appropriate for job candidates who are most significantly disabled, haven't worked, worked primarily in segregated settings, or had little vocational success. Candidates who know their vocational goal are not appropriate for CE. The results from each process of CE are used to generate information by identifying a job candidate's skills, interests, abilities, conditions, contributions, and support needed for employment to design a pathway to a career that focuses on the individual's interest, talents, and contributions (not limitations); to customize a job in the community that does not exist if needed based on the information identified; and provide consultative support to ensure the candidate is successful.
