[1] 146-150 are floating pieces which are not covered in the base LOFT set. The remaining four positions I didn't add (upper left, lower right, center, and lower) are all present in the base set. Their exact positions as I have made them can be adjusted if needed. Their sizes are probably good but not strictly important. Do not add multiple sizes; use only one best size to fit all cases.

[2] Intentionally shaped as a starlike pseudo-octagon. Can fill the following roles: large circle, large octagon, diagonal square, multiple star shapes, and in a limited number of cases, a cross. This shape seems optimal for all of these use cases.
