

Hi, these are what I believe to be the best bridging routes without CEX (lowest fees/slippage) and bridges for each network.

**NOTE THAT ALL BRIDGE PRICING/BRIDGE ROUTING IS DYNAMIC AND THERE ISN'T REALLY EVER ONE "BEST" BRIDGE OR PROTOCOL.**

**Tools like Movr, Li finance, Rango and Chainswap are examples of tools that select the best path in real-time**

I'll update this chart if I find that Wormhole is consistently better, but Synapse gives you the native gas token upon arrival so it's pretty good

**NOTE 1: This chart does not include slippage and transaction fees! Please be mindful when you are bridging!**

**NOTE 2: Bridging from basically any chain to ETH will cost a lot regardless of bridge used.**

**NOTE 3: All bridges are doing amazing work for the space and help to foster the success of multichain networking.**

[My Twitter for deranged thoughts](#)

Please DYOR and check out every bridge as some will suit your needs better than others

Other good bridges: [Connexi](#)

[Algorand Bridge \(Only ETH -- ALGO\)](#)

[Gnosis Bridge \(ETH -- Gnosis\) OR Hop Protocol](#)

[Zilliqa Bridge ETH <=> ZIL](#)

**Rango (referral link) actually does all the routing for you, and has a guaranteed airdrop for high volume/high scoring bridgoors**
