- [1] Title of a resource.
- [2] The author of the resource; preferably use an ORCID ID, GitHub profile link, etc., if available and a text name if not.
- [3] Citation (e.g. doi) that usage of data or resource should be cited with.
- [4] Link to a license or name of license applicable for the resource.
- [5] Main assay type that this protocol is related to, e.g. this is a prep protocol for single-cell RNA-seq assay. This is especially helpful for newly-developed or in-house assays.
- [6] Brief description of the protocol purpose.
- [7] Type of sample used
- [8] Brief free-text comments that may also be important to understanding the resource.
