

**Please find current information regarding the spreadsheet below:**

This is a constantly updated and incomplete list of goth/post-punk and sub genres releases from the whole year.

Bands I've listed play a range of goth genres from goth rock, deathrock, darkwave, coldwave, and ethereal wave but expect influences and/or tracks from other genres, as bands like to mix and experiment, such as electronic/synthpop/new wave/minimal wave/shoegaze, too.

If you have any suggestions, I'll add them to the list. If you're in the Discord, please @ Idolon or please message me on where ever you find this. I think some of these are name your price/free to download, but if you can, buy their merchandise and physical copies of their music. In the current climate, this is especially vital.

If the band is part of a label, I'll add the label to the tape/record labels Wiki on r/goth, so please keep an eye/set up email alerts for these accounts. <https://www.reddit.com/r/goth/wiki/post-punk-goth-darkwave-etc-record-tape-labels/>

We now have incorporated the use of filters/US state abbreviations to make it easier for you to discover bands from your/a specific state! If you are not familiar, please see here: <https://www.bls.gov/respondents/mwr/electronic-data-interchange/appendix-d-usps-state-abbreviations-and-fips-codes.htm>

Sometimes Bandcamp artists delete their music from the website and if this happens, we will turn the entire row grey. If you find the bands music elsewhere, feel free to contact us so we can re-add.

\* on genres are what the album genre is predicted to be based on.

Please do not suggest any band which is already releasing music this by looking at which Bandcamp page their music is being posted

**Key:**
