MARC	Definition	Display Label	Note(s)
5XX-9XX			(Go-live) Local bibliographic data (5XX-9XX)
532	Accessibility Note		Added by UCR to spreadsheet (4/22/21)
586	Awards Note		Added by UCR to spreadsheet (4/22/21)
973	Local Added EntryUniform Title		*Regarding 973 data: campuses use 793s differently across the system. Some use 793 fields for e-resource package information only while others also use it for other types of local collection names. In order to avoid asking campuses to split up their 793s and needing to define another local system-wide field for go-live, RMFG is asking campuses to map all 793 data into the 973 field. If a campus has a separate field that they use for local collections (i.e. not a 793), they can map that to any of the "Local use" tags above.
971	Local Corporate Name	Added Local Name	UCSD is going to combine 970 + 971 using same Display Label (which we hope to revisit after more input)
			Not mapped from a MARC field. If the source is from Alma, the library catalog is used. If the source is external, the source's name
		Source	is used.
		Location	Based on physical location from Alma and is not mapped from a MARC record
		MMS ID	Not mapped from MARC
		Туре	Primo maps resource types from the source into Primo VE for the MARC21 and KORMARC formats. See <u>Mapping to the Display.</u> Facets, and Search Sections in the Primo VE Record
953	Platform		UCSC mapped our video game platform information to this local field so that we could also have a custom facet
903	Discovery		This field is related to UCSC unpurchased DDA records
959	Database Category		Local UCSC field that allows for customization of our database display
