

Monthly Spending Tracking

Gather statements from all your spending sources (bank accounts, paypal, etc), and look through your last month of spending*. Categorize each spend below, then rank that category based on importance.

Some example categories and numbers are included, but you need to enter customised categories that are relevant to you, and your actual spend amounts!

*Instead of looking at one month of spending, it may be more accurate if you used three months, and worked out a monthly average for each spend category!
