

Brand	Name	Flavor	Texture Description	Flavor Description	Sour Rating	Other Notes (e.g. Spicy)	Basic Description	First Take
Little Jasmine	Fruit Jelly Candy	"Cranberry & Blueberry"	Thick soft fruit leather	Natural Fruity flavor also like fruit leather	None		Translucent Dark Purple Crystal Sugar Coated Cube	(Blind Review) A very interesting chew. I expected a more gelatinous texture based on the rebound profile of a quick squeeze. The bite sensation felt reminiscent of a very thick but soft fruit leather. Very nice "natural" feel to both the flavor and texture. Overall an intriguing first encounter, I will have to try some more
?	?	Shikuwasa	Gelatinous slightly dense airy marshmallow	Intense lemon lime. Like if you made 4x strength yellow gatorade	Slightly	Coated in a light powder. Outside surface has much lower flavor intensity than the inside	Light Sugar Coated Translucent Dark Lime Green 1cm Cube	(Blind Review) First thought on initial bite is "this is a wonderful take on the classic Lemon-Lime flavor", and the texture is like a very gelatinous dense marshmallow, in a good way. The coating on the candy is very low intensity flavor, in contrast to the high intensity inside. Thus, as you chew, and reveal more surface area, the overall intensity of the "wonderful take on the classic Lemon-Lime flavor" increases. Great experience, I look forward to trying more of these
Hi-Chew - Japanese Version		Shikuwasa	Medium Soft on the Hi-Chew texture spectrum	Sourness level and taste is kind of like like green apple, but it doesn't taste like a typical apple candy flavor.	Slightly		Japanese Hi-Chew?	(Blind Review) Japanese candy, I think it is Hi-Chew, white core green shell. The words on the wrapper translate to "Make more friends Like when you eat Hi-Chew" through google translate. Hmm. It might be a green apple flavor but I am not sure. Texture is on the very pleasantly soft side of the Hi-Chew texture spectrum, but does not hold a candle to the best in class Kiwi flavor.
Trader Joe's	Fruity Jellies	Orange, Raspberry, Lemon, Blueberry, Grape, Mandarin	A perfect fruit jelly texture, with a crunchy medium-flake crystal sugar coating	Each of the 6 flavors are both itendifiable and pleasant.		GOAT of all candies for on-bike easy calories	Some color overlap, difficult to tell certain flavors apart visually	
Wonka	Nerds Gummy Clusters	Original & Very Berry	Dense gelatinous core coated in Nerds	A flavor bomb of nerd flavor	Slightly	Unique texture. Very satisfying to eat multiple at the same time	Nerd Coated XL Jelly Bean Core	(Experienced Review) This review says it best - <a href="https://www.modernretail.co/marketing/how-gummy-clusters-became-nerds-nerd-product/">https://www.modernretail.co/marketing/how-gummy-clusters-became-nerds-nerd-product/</a>
