

## KNIGHTHOOD RIFT SCORE CALCULATOR

Calculate rift score based on the path that you have selected in the rift.

### How to use the calculator?

1. Initialize the map with base XP and + threat amount if any. You can plot each realm as you go as it does not require you to initialize all seven realms.

**Note: Base XP for High is 100 or 120, Low is 80, Boss is 150.**

**Note: Fully remove attributes of an island by placing 0 instead of leaving it blank.**

2. Add step number to each island that you have initialized to plot your path.

**Note: First step should not be plotted on the rift gate but the first actionable island.**

**Note: Fully remove a step by placing 0 instead of leaving it blank.**

3. Total score will automatically reflect at the bottom right. This score is universal to all tabs.

### Additional Info:

Click below button to reset all realm maps.

1. Click "Clear Map" button to clear the map in the current realm.

2. Click "Reset Path" to reset the path in the current realm.

3. "Last Step" indicates the last used step that was entered across all realms.

4. "Threat" indicates the threat before attempting the latest island that has been numbered.

5. "Step Location With Respect to Realm" indicates which realm does the step originates from.

Reset ALL

### Changelog

11 April 2021 - Added live threat count and step location w.r.t. realm.

8 May 2021 - Added and classified 120XP together with 100 XP as "High" XP island.
